The Author

CHARLES A. RAVENSTEIN is a historian with the Research Division, USAF Historical Research Center, Maxwell Air Force Base, Alabama, where for the past seventeen years he has specialized in organizational lineage and honors. He holds a BS in history (1970) and an MS in education (1973) from Troy State University, and is also a graduate of the USAF Ground Photography School (1949) and the USAF Recruiter's School (1959). Before joining the Historical Research Center, he served twenty years in the Air Force as an enlisted historian, retiring as a senior master sergeant. Mr. Ravenstein has written or collaborated on the following Air Force histories: Charles W. Dickens, *Air Weather Service and Meteorological Satellites, 1950–1960*, (Weather Service Historical Study No. 5, 1973); with Maurer Maurer, *Constraints on Army Air Forces Operations* (Historical Research Division, Aerospace Studies Institute, Air University, June 1969); *U.S. Air Force Victory Credits, Southeast Asia, A Preliminary List* (Historical Research Division, Air University, and Office of Air Force History, HQ USAF, October 1971); with Maurer Maurer, "Peaceful Employment of U.S. Airpower," a chapter in *A Quarter Century of Air Power* (John H. Scrivner, Jr., ed.) Air Force Reserve Officers Training Corps, Air University, 1973); *U.S. Air Force Combat Victory Credits, Southeast Asia* (Albert F. Simpson Historical Research Center, Air University, HQ USAF, 1974); "Combat Narratives: 1965–1968," "Combat Narratives: 1972–1973," and "Glossary of Terms and Abbreviations" in *Aces and Aerial Victories, The United States Air Force in Southeast Asia, 1965–1973* (Albert F. Simpson Historical Research Center, Air University, and the Office of Air Force History, HQ USAF, 1976); *A Guide to Air Force Lineage and Honors*, 2d ed., revised (Research Division, USAF Historical Research Center, 1984).

Foreword

The United States Air Force Historical Research Center and its predecessor organizations have over the years received thousands of requests for brief histories of Air Force organizations. Wing commanders ask for historical data that can be used to introduce the unit to new personnel, build morale, and improve *esprit de corps*. Headquarters USAF and the major commands require historical information to plan organizational changes. Officers throughout the Air Force need historical material for public affairs purposes. Former members of the Army Air Forces and the Air Force are interested in the heritage and history of the organizations in which they served. Government agencies and private individuals, for a variety of reasons, also want to know about Air Force establishments and units and their histories.

Because of the interest in these lineage and honors histories, the USAF Historical Division in the late 1950s compiled a reference volume of Air Force combat organizations—groups, wings, divisions, commands, and air forces. Published in 1961, this volume focused exclusively on organizations active during World War II.* Historians traced each organization from its origin to 1 January 1956. A companion volume followed, containing the histories of combat squadrons active between 7 December 1941 and 2 September 1945.† These squadron histories were carried through 5 March 1963 (the fiftieth anniversary of the 1st Aero Squadron, the first Army unit to be equipped with aircraft for tactical operations). This present volume, the third in the series, is devoted to the Air Force-controlled (AFCON) combat wings of the post-World War II United States Air Force. All of these wings feature numerical designations up to three digits (1 through 706); only five possess history and honors from World War II.** Each wing's history is traced from its origin through September 1977, when the Air Force celebrated its thirtieth anniversary as a separate service.

*Maurer Maurer (ed.), *Air Force Combat Units of World War II* (Washington: USGPO, 1983; New York: Franklin Watts, Inc., 1963; New York: Arno Press, 1979; Washington: Zenger, 1981).

†Maurer Maurer (ed.), *Combat Squadrons of the Air Force, World War II* (Washington: USGPO, 1982).

**These wings are therefore not involved in the temporary bestowal of history and honors described in the introduction to this volume. They are: 1st Special Operations Wing, which began its existence as the 1st Air Commando Group; 24th Composite Wing, which had the same designation during World War II; 26th Tactical Reconnaissance Wing, which dates from 1942 thanks to consolidation in 1965 with the wartime 5th Reconnaissance Group; 54th Tactical Fighter Wing, established in February 1943 as the 54th Troop Carrier Wing; and 301st Tactical Fighter Wing, which began its life in October 1944 as the 301st Fighter Wing.

COMBAT WINGS

Readers should study carefully the explanatory notes (pages ix to xiii) after looking up the unit or units of interest. Each wing entry contains a great deal of information. The way in which units, names, and dates are listed—particularly the punctuation—has specific meaning.

RICHARD H. KOHN
CHIEF, OFFICE OF AIR FORCE HISTORY

Preface

Permanent organizations of the Air Force, whether active or inactive, are Air Force-controlled (AFCON) organizations with a continuing lineage and history. Although some AFCON organizations are named, most are numbered and contain from one to three digits in the numerical part of their designation. (Examples: 1st Tactical Fighter Wing; 28th Bombardment Wing, Heavy; 374th Tactical Airlift Wing.) AFCON organizations, when activated a second or subsequent time, regain their previous lineage, history, honors, and emblem. Temporary organizations, on the other hand, are major command-controlled (MAJCON) organizations without a continuing lineage or history. MAJCON organizations always have four digits in the numerical portion of their designation. (Example: 6510th Test Wing.) Because MAJCON organizations are by nature temporary—designed originally to let major commands meet the exigencies of fast changing circumstances—once inactivated their lineage and history is permanently retired.

This volume deals with one category and echelon of AFCON organization—the “combat” (category) “wing” (echelon). A *combat* wing is one that has, or previously has had, a specific functional designation and mission in combat: bombardment, fighter, strategic and tactical reconnaissance (all types), airlift, air refueling, or missile.* Besides the combat aspects of their flying or fighting mission, combat wings are often charged with operating a base. Whether combat or support in category, all wings occupy an intermediate echelon in the Air Force organizational hierarchy, above groups and squadrons, but below divisions and air forces. Although there are no “typical” combat wings, most usually have two or more assigned combat squadrons in the same functional areas as the wing, or in a closely related functional area. For instance, a tactical fighter wing generally has two or more tactical fighter squadrons, and may also have a tactical fighter training squadron. A bombardment wing will generally have a bombardment squadron and an air refueling squadron. Combat wings often have a variety of support organizations that are permanently aligned with the parent wing through similarity in numerical designation. Combat wings further possess, as a general rule, a significant self-supporting capability in the areas of materiel, maintenance, and munitions. The strength of the United States Air Force is often calculated by the number of active combat wings it controls.

*Some functional designations disguise the combat function under such terms as “Air Commando,” or “Special Operations,” or “Composite,” but the unit is nonetheless involved in one or more of these basic combat missions.

A few wings other than combat wings appear in this volume. The 1st and 377th Air Base Wings, although support establishments, are included because they have in their history controlled combat components. The 46th Aerospace Defense Wing (a "disguised" air base wing) appears because it possesses the temporarily bestowed history and honors of a World War II combat group and may at some future date be employed as a combat wing. Many Air National Guard (ANG) combat wings (designated in the 101–300 block of numbers) have served one or more brief tours of active service with the Air Force, but these wings are controlled in peacetime by the individual states of the United States and do not normally fall into either the AFCON or MAJCON category. For this reason, because the ANG in recent years abandoned strict adherence to the Air Force lineage system, and because histories of these units are sometimes unavailable or records for peacetime periods are lost, the Air Force can no longer determine with certainty the lineage, history, and honors of ANG combat wings. They are therefore excluded. Finally, 66 of the 281 AFCON wings that have existed either as active or inactive establishments since World War II are, or were, either support organizations or did not have a combat flying mission; for these reasons they have been by category also excluded.* Some of these organizations operated under combat conditions, while others have or had flying support functions. Because these wings were organized either to support combat flying operations, or because they had no specific flying mission, they do not fall into the category of "combat flying" wings and therefore do not appear in the volume.

Every AFCON wing appearing in this work is identified by the designation it possessed on 30 September 1977. For each of these wings I have provided information about the lineage, assignments, tactical components, stations, commanders, aircraft and missiles, operations, service and campaign streamers, decorations, and emblem. An explanation of these elements and their treatment is contained in the explanatory notes. In preparing any reference work, one has finally to draw a line between what can and cannot be reasonably included. Thus, some important elements, such as the wing support components and the full designation of tactical components, have been purposefully, if reluctantly, excluded.

Most of the sources used to prepare this volume are located in the document collection of the United States Air Force Historical Research Center at Maxwell AFB, Alabama. Perhaps most important among these sources are histories that Air Force organizations at all echelons have prepared periodically and sent to the

*They are: 1st Medical Service Wing; 1st through 7th, plus the 43d and 59th, Weather Wings; 9th Weather Reconnaissance Wing; 13th 24th, 25th, 29th, 30th, 39th, 59th, 73d, 75th, 77th, 80th, 85th, and 88th Air Depot Wings; 39th and 40th Aerospace Rescue and Recovery Wings; 41st Aerospace Rescue and Weather Reconnaissance Wing; 73d Aerospace Surveillance Wing; 82d Combat Security Police Wing; 501st and 601st Tactical Control Wings; 507th and 602d Tactical Air Control Wings; 544th Strategic Intelligence Wing; 554th Operations Support Wing; 603d Air Base Wing; 901st–907th, 910th–918th, 920th–926th, and 928th–930th Reserve Training Wings; and 941st–944th Reserve Air Depot Training Wings.

Historical Research Center under the auspices of the Air Force history program. Wing histories and their supporting documents served as the primary sources, of course; but histories of wing components, or of divisions and numbered air forces that controlled the wings, were frequently consulted. These related histories often furnished crucial information during those periods when a wing history was poorly prepared, or not prepared at all. The organization record cards of each USAF unit and establishment, maintained by Headquarters USAF until early 1978 and thereafter by the Historical Research Center, provided an important source of information. Most of the material on wing emblems was obtained at the Air Force Manpower and Personnel Center, Randolph AFB, Texas, although many emblems also came from the Defense Audio Visual Agency's Still Photo Depository at Arlington, Virginia. The periodic *Directory of United States Air Force Organizations*, published by Headquarters USAF from September 1947 through November 1973, provided valuable information about active wings, their assignments, and stations.* Finally, primary source documents in the Historical Research Center collection, including command station lists, G-series special orders, operations plans and reports, organizational directories, Department of the Air Force Manpower and Organization numbered letters, and similar records, were indispensable.

Unfortunately, even among this plenitude of sources, it sometimes proved impossible to ascertain specific facts. The full names of wing commanders and the exact dates they assumed command, for example, were often not to be found. To determine a particular fact from fragmentary and sometimes conflicting evidence, some choices necessarily represent my best judgment.

I prepared this volume between 1969 and 1982, usually in addition to other duties, as time permitted. Other Air Force historians also contributed significantly to the research and writing of this book: Harry R. Fletcher, Gerard E. Hasselwander, Donald D. Little, and Lieutenant Colonel Forrest B. Dowdy (an Air Force Reservist who performed his training at the Historical Research Center). Guidance for this work was provided by Maurer Maurer, James N. Eastman, Jr., Lloyd H. Cornett, Jr., and R. Cargill Hall. Pauline Tubbs, Dorothy M. McCluskie, and Peggy C. Brown ably assisted in the editing and typing. I wish to extend special thanks to personnel in the Recognition Branch, Air Force Manpower and Personnel Center, and to personnel of the Defense Audio Visual Agency, who went out of their way to furnish illustrations for the wing emblems.

Explanatory Notes (How to Use this Book)

The following notes explain how the information in this book is arranged, and the terms and format used in Air Force lineage and honors histories.

Heading. The heading comprises the numerical and functional designation of the wing as of 30 September 1977. Each combat wing appears in numerical order, and, when required, in alphabetical order under the number. (Three wings carry the number "1," two are numbered "301," and two are numbered "322.")

Lineage. (See Appendix I.) The official USAF statement of lineage, or "genealogy," forms the foundation of the wing's history and governs the wing's inheritance of emblem and honors. The Air Force lineage system, described in Air Force Pamphlet 210-2, applies to Reserve organizations and the regular Air Force. (As noted earlier, the Air Force can no longer determine with certainty the lineage, history, and honors of ANG combat wings, and thus the Guard wings are not included in this volume.)

One peculiarity will be noticed in the lineage of some wings that appear in this book. In August 1947, the Air Force began a service test of what was

called the "wing-base" plan. This test, conducted with 29 combat wings, proved the wing-base plan to the satisfaction of the Air Force. In 1948 the service discontinued all of the temporary service-test units and establishments and replaced them with new, permanent units and establishments with the same numerical and generally the same functional designations. Beginning in July 1948, the new wings replaced the discontinued wings; in most instances the permanent wings activated on the same day the temporary wings discontinued, but in a few cases the permanent wings activated a day or two before the discontinuance of the temporary wings. On the surface, these overlapping lineages appear erroneous; nevertheless, they conform to the orders of the time. Because the personnel, assignments, components, stations, facilities, equipment, and missions of the service-test wings passed completely to the new, permanent wings that replaced them, the Air Force has unofficially considered both variants of the wings to

be the same organization. But without an official consolidation directive, they remain separate establishments. In this book, the temporary and permanent wings are treated as single establishments.* The overlapping of dates in the lineage statement therefore carries over to other sections including assignments, components, stations, and commanders.

Assignments. Each of the wing's immediate higher "parent" organizations is listed chronologically. A single date indicates the date of assignment; where a double date appears, the second date indicates termination of assignment. A semicolon is used to show a change of assignment while the wing remained active; a period indicates the wing was disbanded, discontinued, or inactivated. If the wing was attached for operational control to another organization, the attachment appears in parentheses, with brackets used to set off parenthetical elements within parentheses. Each attachment contains double dates.

Components. Tactical components assigned, or attached for operational control, to the wing are listed in hierarchical and numerical order. Each list shows only those components at the first subordinate echelon; the lists do not show subordinate squadrons of an assigned or attached group because these squadrons were not directly assigned to the wing. Of the tactical components, only the numerical designation appears if the functional designations (e.g., fighter, bombardment) were

identical for both the component and wing. If the numerical designation of a component changed during its period(s) of assignment or attachment, the later designation is shown parenthetically. Example: 705th (later, 962d). Support-type components (medical units, an air base or combat support group, maintenance squadrons, and other support squadrons and flights) are excluded.

A semicolon separating dates indicates a break in assignment or attachment. A comma indicates a change with no break in wing control. A squadron attached for a time and then assigned (with no break in wing control), for example, would be shown: attached 1 Jan–29 Jul 1952, assigned 30 Jul 1952–12 Jul 1957. Interrupted, attached service in a series would read: attached 12 Jul–10 Aug 1956, 17 Nov 1956–3 Jan 1957, 10 Jul–19 Aug 1957, and so forth, with commas separating the series entries. This same procedure is used to show detached status of wing components, when such detached periods are frequent.

Periods of detached service, when components are detached from wing control for duty with another organization, appear in parentheses. Likewise, components not operational for specific periods are shown in parentheses. In some cases the exact dates for detached service, or dates for those periods when a component was not operational, could not be determined with certainty. A *circa* (c.) date is used in these instances.

*A more detailed explanation of the pivotal wing-base service test appears in the introduction to this book.

Stations. Permanent locations of the wing headquarters are listed chronologically. The name of each base is the one in use at the time the wing arrived, with any changes appearing in parentheses. Some foreign nations that hosted wings are identified by their "popular" name, rather than their official name. Thus, the Republic of Korea appears as South Korea, the Republic of Vietnam as South Vietnam, and the Republic of China as either Formosa or Taiwan, depending upon the period. Wings located in the Federal Republic of Germany, or in occupied Germany prior to 1 September 1949, are listed as being in West Germany. A single date indicates the arrival of the wing at a base. Semicolons separate the station-and-date entries while the wing remained active, but changed stations. If a wing moved from one theater of operations to another, a double date is provided for the station being vacated. A double date is also provided whenever a wing arrived at a base and was subsequently disbanded, discontinued, or inactivated. A period at the end of a second date indicates disbandment, discontinuance, or inactivation.

Commanders. Wing commanders are listed chronologically, along with the highest rank attained during the command tenure. Commanders are shown for all periods when the wing was active. Between 1959 and 1968 the Air Force required two organizational actions (activate and organize) to place personnel in a wing headquarters (and in other units). During the time a wing was activated but not yet organized, the entry shows "None (not manned)," together with double dates, followed by a semicolon and the actual list of com-

manders. Whenever active wings were not manned at other times, the "None (not manned)" statement and double dates also appear. If for some reason a wing commander was at first temporarily and then permanently appointed, the commander's name may be followed by one date and a parenthetical "temporary," followed by a second date and a parenthetical "permanent."

Lists of commanders are as accurate as the sources permitted. Some wings kept excellent historical records; others kept poor records, or none at all. Commander lists, therefore, sometimes contain "unknown" as an entry, and in many of the commander lists, *circa* (c.), or some other indicator such as "by" this date, are to be found. A second date followed by a semicolon indicates a gap in the commander list. A second date followed by a period indicates the wing headquarters inactivated.

Aircraft/Missiles. The aircraft, aircraft and missiles, or missiles used by wing components assigned and attached for operational control appear in this section. In the missile category, only strategic or tactical surface-to-surface missiles are included. (Air-to-air, air-to-ground, or surface-to-air missiles are considered ordnance and are not included.) The section title accounts for the type(s) of weapon systems. Aircraft are listed by series and number (e.g., F-86 or EC-135), but not by model (e.g., B-52H or KC-135A). Missiles are listed by their popular names (e.g., Atlas, Titan I, Minuteman III). The years during which the wing possessed the weapon systems are also listed (e.g., RF-101, 1959-1965). Because many wings often possessed different

weapon systems simultaneously, these different systems, with the dates of possession, are separated by semicolons. The final entry is followed by a period. A wing may also have had the same weapon systems at different times. Example (for a wing activated in 1950, inactivated in 1961, activated again in 1963, and inactivated in 1967): Aircraft. B-47, 1950-1955; KC-97, 1953-1955; B-52, 1956-1961; KC-135, 1955-1961. B-52, 1963-1967; KC-135, 1963-1967; EC-135, 1966-1967.

A wing often lost possession on a temporary basis of one or more of its weapon systems. This occurred, for example, when its tactical components were detached with all of the aircraft for duty elsewhere. Such temporary absences of a weapon system are shown by a comma. Example: B-52, 1957-1960, 1960-1962, 1963-1965; KC-135, 1956-1958, 1958-1960, 1960-1961, 1961-1965. In other words, for a time in 1960 and in 1962-1963, the wing had no B-52 aircraft for its own use, all being under the control of another organization. Likewise, for short periods in 1958, 1960, and in 1961, the wing did not control KC-135 aircraft.

Operations. Information in this section, though abbreviated, includes all combat and other significant operations, often with a discussion of the particular aspects of combat. Oversea deployments of the wing are mentioned, together with changes in wing status and its mission. Speed or distance records are frequently cited. For reasons of security classification, numerous significant wing operations dur-

ing the decade 1967-1977 are excluded, or mentioned only briefly.

Readers who wish to know more about a wing's operations can visit the Historical Research Center to conduct research, or purchase through the mail microfilm copies of the unclassified wing histories.

Service Streamers. (See Appendix II.) Service streamers represent noncombat service in the various theaters of military operations. Those service streamers earned by a wing are listed here. (If a wing participated in combat operations in a theater, it earned a campaign streamer instead of a service streamer.)

Campaign Streamers. (See Appendix II.) The Historical Research Center evaluates and verifies unit combat credits. Verified combat credit entitles a unit to the appropriate campaign streamers representing the named campaigns in which a wing participated. Research often shows that a wing is entitled to campaign credits never awarded on orders, or has received improper campaign credit awarded in error. This official list of campaign streamers is based upon each wing's verified combat record.

Decorations. (See Appendix III.) Decorations include citations and awards recognizing distinguished or meritorious acts by the wing. In this list, the type of decoration is cited together with specific dates, if dates appeared in the award document. Erroneous dates were revised and corrected dates shown within brackets. For example, the dates stated in an order may cover a time before a wing was active or after it became inactive; indeed, an order may cite a date before

the wing even became engaged in the activity for which it received an award. Air Force Pamphlet 900-2, produced by the Air Force Manpower and Personnel Center, contains the official listing of unit decorations, including wing decorations. The decorations listed in this volume generally agree with those appearing in the pamphlet, but some revisions have been made based on research into actual wing operations.

Emblem. For those wings holding an official emblem approved by Headquarters USAF (and most do possess emblems), the wording of the “blazon” is provided in its official heraldic language. Many wings have had two or more emblems in the 30 years covered

by this book; the emblem in use on 30 September 1977 is the one included here. Headquarters USAF authorized a temporary history bestowal in 1954 that allowed combat wings to use, under certain circumstances, the history, honors, and emblem of the older combat group of the same number. Thus, many postwar combat wings use the same emblem that their like-numbered combat groups used in World War II.*

If the emblem included a crest, the crest is described. Any official motto is cited, and translated to English if necessary. Finally, the date Headquarters USAF approved the emblem is cited within parentheses. If a motto was approved separately, the date of approval is also shown.

Introduction

Organizations known as “wings” have been used by the Air Force for many years. Indeed, in July 1918 the American Expeditionary Forces of the United States Army organized its first aircraft establishment higher than a group: the 1st Pursuit Wing. Although this wing did not survive demobilization after World War I, new wings were created in the 1920s and 1930s. During World War II numerous wings existed; some provided training in the United States, others controlled combat groups and support organizations overseas. Rapid demobilization after September 1945 meant that a new Air Force had to be built with the remnants of the wartime Army Air Forces.

The service test of a wing-base plan in 1947–1948 prompted an important change in the field structure and organization of the Air Force. Old-style World War II wings supervised a mixture of combat groups and support organizations. None of the subordinate organizations were permanently affiliated with the wings, or possessed similar numerical designations or standard functions. The wings organized for the service test featured standard functions. Each wing had a combat group, a maintenance and supply group, an airdrome group (to operate base facilities and services), and a station medical group, all with identical numerical designations. The 1947–1948 wing-base service test rendered more nearly uniform the functions of the wing elements, and permanently aligned, or affiliated, support units with the parent wings through similarity in numerical designations.

All of the Air Force wings involved in the postwar service test, whether manned by Table of Distribution (T/D) or Table of Organization (T/O) manning authority, were Air Force-controlled (AFCON) establishments.* The Air Force reserved the numbers 1 through 999 for these permanent organizations. In addition to the permanent AFCON wings that replaced the service-test organizations in 1948, USAF provided for temporary organizations to be controlled by major commands. The commands wanted a flexible organization at the lower echelons to permit the rapid adjustments in manning that short-term requirements often dictated. Because the manning of permanent T/O organizations was judged to be too rigid, in 1948 the Air Force created a new type of temporary organization, to be manned under T/D authorization.

*The term “AFCON” applies to all those units under the direct control of Headquarters USAF for organizational actions. The term applies retroactively to the service-test wings.

For a time, the Air Force differentiated between its temporary and permanent organizations by calling the temporary ones “designated” or “T/D,” while the permanent organizations were referred to as “constituted” or “T/O.” The temporary major command-controlled organizations would eventually become identified as “MAJCON,” with the permanent ones known as “AFCON.” The new MAJCON organizations* would not have a continuous lineage or history. The commands would designate (i.e., give a number and functional designation), organize (later, activate), redesignate, and discontinue (later, inactivate) them as needed, using the four-digit numbers allotted to each command by Headquarters USAF.† When a temporary establishment or unit was discontinued (later, inactivated), its life ended, never to be revived. The number of this establishment or unit could then be reused to designate another, entirely new, temporary establishment or unit. Although the original intent was to provide major command flexibility in establishing and terminating short-lived, temporary organizations, some MAJCON organizations have now existed as long as their AFCON counterparts—well over 30 years.

Generally, postwar AFCON combat wings have had a double mission: train for and conduct combat operations (through the combat group and that group’s combat squadrons), and operate a permanent installation (through assigned support components). AFCON organizations have two privileges not shared by MAJCON organizations. One of these is reincarnation with full lineage, history, and honors through reconstitution of units or reestablishment of establishments. AFCON organizations can also be consolidated with one or more separate AFCON organizations that existed at different times to form a single entity, with the lineage, history, and honors of all retained.

In 1952 many of the World War II combat group headquarters began to be phased out as more wings assumed direct control of the combat squadrons, particularly those assigned to the Strategic Air Command (SAC) and Air Defense Command (ADC). At this time, Air Force strength began to be calculated in wings instead of groups, and the service possessed 95 wings. By the end of Korean hostilities on 27 July 1953 the number of combat wings had increased to 106, in part achieved by ordering Reserve and Air National Guard organizations to active service. Although these additions to the regular Air Force served only a specified number of months, many of them were replaced at the termination of their active duty by newly-established wings of the regular Air Force. The elimination of combat groups and retention of wings soon raised a question about honors. The groups—all veterans of World War II combat operations—held collectively many

*The term “MAJCON” applies to all those units under the direct control of major commands for organizational actions. Although the term did not exist in 1948, it applies retroactively to the temporary organizations of that period.

†The Air Force assigned blocks from the numbers 1000 through 9999 to the major commands for their use.

honors, while the postwar wings possessed few if any honors. Could not the World War II history and honors be assigned to the wings?

Both SAC and ADC wanted to retain the honors of these groups. In 1954 the two commands asked Headquarters USAF to assign these honors to the like-numbered postwar combat wings, thereby perpetuating the history and honors of the World War II groups. After study, Headquarters USAF decided to bestow the history and honors of combat groups on like-numbered combat wings. For example, the 9th Bombardment Wing, established after World War II, received by temporary bestowal the history of the 9th Bombardment Group, together with the campaign credits and decorations that had been earned by the group during World War II. In "bestowing" group history and honors on wings, USAF directives did not specify any conditions or limitations except to advise, in letters authorizing such bestowals, that these bestowals were temporary. In 1963 interested USAF agencies developed rules governing temporary bestowal (see Appendix V), but the act of assigning combat group history and honors to combat wings remains today probably the most misunderstood aspect of USAF lineage and honors.*

Although most of the wings included in this volume are authorized temporary use of the history, honors, and emblem of their aligned or affiliated combat group (the combat group having the same number in its designation as the wing), the group's lineage and honors are not included here. Maurer's *Air Force Combat Units of World War II* provides these details for the groups, at least through World War II and up to January 1956. In a few instances, however, we have used the emblem authorized the combat group if the combat wing possessed no later emblem of its own.

*On 31 March 1982 the Department of the Air Force acted to eliminate some of the confusion in the temporarily bestowed histories, issuing MPM letter 422q that consolidated the 11th Strategic Group and the 11th Air Refueling Wing; the 307th Bombardment Wing, Very Heavy, the 307th Strategic Wing, and the 307th Air Refueling Group, Heavy; and the 340th Bombardment Wing, Heavy, and the 340th Air Refueling Group, Heavy. In each case, the group and wing(s) became a single organization. Two years later on 31 January 1984, Department of the Air Force letter 539q consolidated more World War II combat groups with their like-numbered postwar combat wings bearing the following numerical designations: 15th, 25th, 29th, 32d, 34th, 35th, 39th, 40th, 42d, 46th, 70th, 72d, 75th, 80th, 95th, 96th, 99th, 100th, 310th, 320th, 321st, 328th, 341st, 345th, 351st, 355th, 379th, 380th, 381st, 384th, 385th, 389th, 390th, 392d, 397th, 401st, 407th, 410th, 413th, 416th, 432d, 449th, 451st, 455th, 460th, 462d, 478th, 484th, 494th, 497th, 499th, 500th, 506th, and 508th. Where a group or wing was active, the designation of the active establishment was retained. These consolidations virtually end USAF-bestowed history and honors, for few wings now remain that qualify for that program.

Air Force Combat Wings

THE COMBAT WINGS

1st AIR BASE WING

Lineage. Established as 1st Composite Wing on 9 May 1969. Activated on 1 Jul 1969. Redesignated 1st Air Base Wing on 1 Jul 1976. Inactivated on 30 Sep 1977.

Assignments. Headquarters Command, USAF, 1 Jul 1969; 76th Airlift Division, 1 Jul 1976–30 Sep 1977.

Components. Squadrons. 1st Air Transport: 1 Jul 1969–30 Jun 1971. 1st Airborne Command and Control: 1 Jul 1969–1 Nov 1975. 1st Flying Training: 1 Jul 1969–30 Jun 1971. 1st Helicopter: 1 Jul 1969–1 Jul 1976. 1st Composite: 1 Jul 1971–30 Jun 1975. 2d Composite: 1 Jul 1971–30 Jun 1975.

Stations. Andrews AFB, Md, 1 Jul 1969–30 Sep 1977.

Commanders. Brig Gen Richard A. Knobloch, 1 Jul 1969; Col Benjamin M. Matlick, Jr., 1 Feb 1970; Brig Gen Carlton L. Lee, 1 Mar 1970; Brig Gen Clarence J. Douglas, Jr., 25 Aug 1972; Brig Gen William E. Brown, Jr., 31 Jan

1975; Col Leonard R. Peterson, 17 Jun–30 Sep 1977.

Aircraft. C-47, 1969–1972; C-54, 1969–1970; C-118, 1969–1975; C-131, 1969–1975; CH-21, 1969–1971; EC-135, 1969–1975; T-29, 1969–1973; T-33, 1969–1973; T-39, 1969–1975; TH-1, 1969–1971; UH-1, 1969–1976; CH-3, 1970–1976; VC-131, 1971–1975; KC-135, 1973–1975; E-4, 1974–1975.

Operations. Replaced 1001st Composite Wing, absorbing its personnel and resources, on 1 Jul 1969. Provided airborne and ground alert operations required for the support of a National Emergency Airborne Command Post (NEACP). Exercised command jurisdiction over Andrews AFB, Md, and over assigned elements. Supported tenant organizations at Andrews AFB. Provided flight management of mission support operations, including high priority airlift. Supported proficiency flying training of assigned and attached personnel, and for personnel of HQ USAF, HQ AFSC, and other organizations within the greater Washington, D.C., area. Furnished base support and services for transient aircraft, both domestic and foreign. Engaged in emergency airlift and search and rescue missions. Two composite squadrons inactivated on 30 Jun 1975, and the 1st AC&CS transferred on 1 Nov 1975, leaving only the CH-3s and UH-1s operated by the 1st Helicopter Squadron.

The latter transferred on 1 Jul 1976. From then until inactivation on 30 Sep 1977 the wing operated, administered, and maintained Andrews AFB, providing logistical support for tenants. Replaced by 76th Air Base Group on 1 Oct 1977.

Service Streamers. None.

Campaign Streamers. None.

Decorations. Air Force Outstanding Unit Award: 1 Jul 1976–30 Jun 1977.

Emblem. On a shield per bend gules and azure, a conventional air base runway, throughout argent. *Crest:* On a wreath of the unit's colors (argent and azure), a quill or and a wrench gules in saltire, interlaced with a cogwheel azure. (Approved on 22 Apr 1955 for 1401st Air Base [later, 1001st Composite] Wing; used 1 Jul 1969–30 Sep 1977 by 1st Composite [later, 1st Air Base] Wing.)

1st SPECIAL OPERATIONS WING

Lineage. Established as 1st Air Commando Group on 9 Aug 1944, replacing the 1st Air Commando Group (a miscellaneous unit) that was constituted on 25 Mar 1944, activated on 29 Mar 1944,

and consolidated on 9 Aug 1944 with the headquarters unit of the new establishment. Inactivated on 3 Nov 1945. Disestablished on 8 Oct 1948. Reestablished on 18 Apr 1962. Activated, and organized, on 27 Apr 1962. Redesignated: 1st Air Commando Wing on 1 Jun 1963; 1st Special Operations Wing on 8 Jul 1968; 834th Tactical Composite Wing on 1 Jul 1974; 1st Special Operations Wing on 1 Jul 1975.

Assignments. Operations. Replaced the 5318th Provisional Air Unit in India in Mar 1944. As a miscellaneous unit, the group was comprised until Sep 1944 of operational sections (rather than units): bomber; fighter; light-plane (and helicopter); transport; glider; and light-cargo. The group provided fighter cover, bomb striking power, and air transport services for Wingate's Raiders, fighting behind enemy lines in Burma. Operations included airdrop and landing of troops, food, and equipment; evacuation of casualties; and attacks against enemy airfields and lines of communication. Converted from P-51 to P-47 fighters and eliminated its B-25 bomber section in May 1944. In Sep 1944, after the original unit was consolidated with the headquarters component of the new establishment (also called 1st Air Commando Group), the sections were

replaced by a troop carrier, two fighter, and three liaison squadrons. The group continued performing supply, evacuation, and liaison services for allied forces in Burma until the end of the war, including the movement of Chinese troops from Burma to China in Dec 1944. It also attacked bridges, railroads, airfields, barges, oil wells, and troop positions in Burma and escorted bombers to Burmese targets, including Rangoon. Switched back to P-51s in May 1945. Left Burma in Oct and inactivated in NJ in Nov 1945.

Replaced the 4400th Combat Crew Training Group in Apr 1962 and assumed air commando operations and training responsibility. Also assumed a detachment in South Vietnam from the prior group and continued training USAF and South Vietnamese Air Force aircrews in the United States and South Vietnam throughout the Southeast Asian conflict. The group (later, wing) maintained a quick reaction force and conducted specialized operations in unconventional warfare, counterinsurgency, psychological activities, and civic actions at trouble spots around the world by deploying mobile training teams, detachments, and components as required. Although Southeast Asia received the bulk of the unit's attention until 1973, air commando (later, special operations) personnel were active in Panama, Central and South America, Europe, Africa, and the Middle East at various times. Trained personnel of friendly states, sometimes in the United States and sometimes by deployed teams. States receiving training included Iran, Greece, Saudi Arabia, Mali, El Salvador, the Dominican Republic, Costa Rica, Guatemala, the Re-

public of Vietnam, Thailand, Ethiopia, Venezuela, Ecuador, Nicaragua, Bolivia, and the Republic of the Congo.

The group (wing) also worked closely with U.S. Army Special Forces, developed combat tactics for numerous types of aircraft, and conducted combat crew training for USAF and foreign aircrews. It participated in a number of tactical exercises, both at home and abroad, and occasionally participated in mercy missions and humanitarian operations. One such operation involved eradication of screwworm flies in Puerto Rico and the Virgin Islands, requiring numerous missions in the early 1970s.

Between 11 Jan and 30 Jun 1974, the USAF Special Operations Force and 1st Special Operations Wing merged their operations, and on 1 Jul 1974, the wing—temporarily known as 834th Tactical Composite Wing—assumed responsibility for operating the USAF Special Operations School and the USAF Air Ground Operations School, the former training selected American and allied personnel in special operations, and the latter training personnel in concepts, doctrine, tactics, and procedures of joint and combined operations.

Operations. Trained in fighter and reconnaissance operations and supported strategic bombardment training, 1947–1948 and 1948–1950. Was integrated experimentally with a reconnaissance wing, 1947–1948 and 1948–1949, and with a bombardment wing, 1949–1950, sharing commanders in common during much of this time. Supported Operation Haylift, a humanitarian effort to deliver feed to snow-bound cattle in the western United States, 1949. Provided air defense in southern Calif from mid-1950 until inactivated in 1952. Provided air defense in the upper Midwest area, 1956 through 1969, then moved to central Calif, still in an air defense role. Had no tactical units under its control, May–Nov 1969. Moved to Fla in Oct 1970, where its mission changed to tactical fighter, assuming operational commitments of the 15th TFW. Assumed an F-4 transitional and replacement pilot training role in 1971, some of its aircrews and equipment being deployed from time to time in a variety of tactical exercises. Moved to Langley AFB, Va, in 1975 and converted to F-15s, participated in the F-15 weapons system evaluation program in 1976 and in deployments to Europe in 1977.

Operations. Wing headquarters not operational, 5 Nov 1947–12 Jul 1948 and 12 Jul–31 Dec 1948. Tactical group attached to 43d Bombardment Wing during these periods (except for a short period it spent in England, in 1948). Entire wing moved from Ariz to Ga on 1 Jan 1949 and manned from resources of other organizations. Converted from B–29 to B–50 bombers in 1949–1950

1947–1977

and trained in global bombardment operations from Jan 1949. Added air refueling to mission in Dec 1950. Deployed at RAF Mildenhall, England, May–Aug 1951, RAF Upper Heyford, England, Sep–Dec 1952, and Sidi Slimane AB, French Morocco, Aug–Sep 1954 and Jul–Aug 1956. Converted to B-47 jet bombers in 1954. Service tested a “super wing” concept with 70 B-47s, Jul 1959–Apr 1961. Moved to Barksdale AFB, La, on 1 Apr 1963, replacing 4238th Strategic Wing and absorbing that wing’s B-52 and KC-135 resources. Supported Second Air Force’s post attack command and control system, Apr 1963–Mar 1970. Conducted bombardment training and air refueling operations, Apr 1963 to date except for periods when all aircraft and crews were on loan to SAC organizations involved in combat operations in Southeast Asia. Began supporting SAC operations in Southeast Asia with aircraft and personnel in 1965, and increasingly supported these operations in 1966 and 1967. On 15 Apr 1968, gained a second B-52 and a second KC-135 squadron, again becoming a SAC “super” wing. From late May 1972 until 26 Oct 1973, all wing B-52 resources loaned to SAC organizations in the Far East and Southeast Asia; from May 1972 to early Nov 1972, all but four of the wing’s KC-135s and a few aircrews loaned to other SAC units. After the return of combat resources, the wing continued supporting SAC operations in Southeast Asia into 1975, on a reduced scale.

Operations. Trained as a bombardment and reconnaissance wing prior to Korean war. Combat in Korea, 1–19 Jul 1950. Tactical units operated under wing control from Iwakuni AB, Japan, 1–19 Jul 1950. On 20 Jul 1950 the tactical group and its squadrons served under operational control of another organization. The wing assumed a supporting role, initially from Johnson AB, Japan, but later from Yokota AB, Japan. Wing returned to Iwakuni AB on 1 Dec 1950, regaining control of its tactical units, performing combat in Korea. Moved to South Korea in Aug 1951. After Korean war, wing participated successively in bombardment, air defense, reconnaissance, and air refueling training (its headquarters being non-operational 1 Sep 1963 to 8 Jan 1964).

Moved to the United States without personnel or equipment in Jan 1964, then trained and rotated its squadrons in detached status to Southeast Asia for combat duty. Moved to South Vietnam in Nov 1965 and took an active combat role until 31 Oct 1970. During this time, wing also participated in combat evaluation of F-5 and F-37 aircraft. Unmanned and unequipped on 31 Oct 1970, the wing remained active in a “paper” status until it moved without personnel or equipment to South Korea on 15 Mar 1971. Manned and equipped in South Korea with F-4 aircraft, and underwent numerous organizational changes. In Sep 1974, moved without personnel or equipment to Clark AB,

Philippines, replacing 405th Fighter Wing. Participated in frequent operational exercises and evaluations. Between 5 Apr and 31 May 1975, wing used its facilities as a staging area for Operations Baby Lift (evacuation of Vietnamese orphans from South Vietnam to the United States) and New Life (evacuation of Vietnamese adults to the United States for resettlement). T-38 fighter training operations began in Jan 1976.

Aircraft and Missiles. B–29, 1951–1952; KB–29, 1951–1952; B–36, 1952–1957; B–52, 1957–1967; Atlas, 1962–1965; KC–135, 1958–1967, 1967–(attached); RC–135, 1967–.

Operations. Conducted strategic bombardment training from activation in 1951 until 1 Sep 1959, with air refueling as additional mission in 1951–1952, and again from Apr 1958. Deployed at Andersen AFB, Guam, Oct 1955–Jan 1956. Two bombardment squadrons (24th and 30th) joined the 4129th CCTS in Sep 1959, training B–52 and KC–135 crews, while the 40th Bombardment Squadron continued flying operational missions until 10 Jun 1960. From 10 Jun 1960 to 1 Dec 1961 the wing flew but a few operational missions in a non-combat ready status. A missile squadron joined the wing's resources in Sep 1961. The 40th Squadron returned to operational status on 1 Dec 1961 and on 5 Sep 1963 the other two bomb squadrons also regained tactical status. The 39th discontinued a few days later, but the 24th and 40th Squadrons continued global

bombardment training through Dec 1966, when they phased down for inactivation. The missile squadron phased out its Atlas operations in Feb 1965 and inactivated a month later. On 25 Mar 1967 the wing moved without personnel or equipment to Eielson AFB, Alaska, where it replaced the 4157th Strategic Wing and assumed resources and missions of that wing. In Alaska, the wing flew RC–135 strategic reconnaissance missions with an assigned squadron, and KC–135 air refueling missions with aircraft deployed to Eielson from other SAC wings. From Apr 1968 to Jul 1972 the wing periodically served as the airborne monitor of the Alaskan ballistic missile early warning station. The wing maintained a detachment at Shemya AFS, in the Aleutians, and operated from that base except for the periods Feb–May 1975 and Jun–Sep 1976, when the base closed for the repair of earthquake damage.

Aircraft. B–29, 1947–1948; B–36, 1948. B–29, 1948; B–36, 1948–1958; XC–99, 1949; RB–36, 1950; B–52, 1957, 1958–1965, 1965–1969, 1970–; KC–135, 1958–1960, 1964–1965, 1965–1969, 1970–.

Operations. Trained with B–29s in global bombardment operations, Nov 1947–Jul 1948 and Aug–Dec 1948. Began converting to B–36 bombers in Jun 1948. Controlled two B–36 groups, Dec 1948–Feb 1951, and three B–36 squadrons, Feb 1951–May 1958. Flight tested XC–99 in Jun 1949 and evaluated RB–36 in 1950. Deployed at Nouasseur AB, French Morocco, 10 Jul–13 Sep 1955. Had an attached B–52 squadron, 1–10 Dec 1957, and converted to B–52 bombers and KC–135 tankers, May–Jun 1958. Trained in global strategic bombardment and air refueling operations. Beginning 13 Apr 1965 the wing deployed its forces to the Pacific area to support SAC combat operations in Southeast Asia. All wing bombers and tankers, along with aircrews and some support personnel, deployed in Apr–May 1965. In the United States, the wing gained the assets of a second B–52 squadron from another wing in Jun 1965, giving it a bomber capability again. From Jun 1965 until Jun 1968 the wing operated with two B–52 squadrons. All B–52 resources deployed to the Pacific area by 1 Aug 1965, along with most of the wing’s remaining support personnel, leaving the 7th Wing as a small non-flying cadre to operate Carswell AFB, Texas. Wing headquarters remained non-operational to c. 1 Dec 1965, when B–52/KC–135 resources began returning. The wing continued to

support SAC operations in Southeast Asia through the remainder of the conflict and into 1975, but on a reduced scale except for the period c. 1 Sep 1969–c. 28 Mar 1970, when most wing resources were required overseas and only a small cadre remained at home. The wing again became a two B–52 squadron wing on 31 Dec 1971. In addition to its other activities the wing conducted B–52D consolidated training for SAC, 1 May 1972–c. 15 Dec 1972 and 5 Jan–15 Dec 1973. By mid-1973 most wing KC–135 resources had redeployed, and most B–52 resources returned by Jan 1974. The wing resumed nuclear alert status on 3 Jan 1974. From 4 Dec 1973 to May 1975 the wing conducted B–52D replacement training, and from Jan 1974 also conducted B–52D combat crew training, i.e., providing B–52 flight training to novice crews. Beginning in Jun 1974 the wing also conducted B–52 and KC–135 Central Flight Instructors’ courses.

Operations. Air defense in Japan, Aug 1948–Jun 1950. Combat operations in Korea, Jun 1950–Jul 1953, at times operating from bases in North and South Korea and at other times from bases in Japan. Air defense in South Korea, Jul 1953–Oct 1954. Air defense in Japan, and maintenance of a quick reaction strike force, Oct 1954–May 1964. Tactical squadrons detached on 13 May 1964, and on 18 Jun 1964 all wing components except wing headquarters inactivated. The wing moved without personnel or equipment to Calif, absorbing resources of the 32d TFW. For the next year the wing trained with F–4 aircraft and participated in numerous exercises, operational readiness inspections, and the like. Moved to Thailand in Dec 1965 and commenced combat operations. Operations included bombardment, ground support, air defense, interdiction, and armed reconnaissance. Numerous enemy aircraft fell prey to wing components and wing became known as the “MiG Killer.” In the latter stages of the Southeast Asian conflict the wing’s mission shifted away from combat air patrol as new types of aircraft became part of the wing’s force, and in this

stage of the war the wing gained fame as the "Bridge Busters." During its final years of combat the wing used B-57s for night attacks, AC-130 gunships for ground support and armed reconnaissance, and F-4s for fast-forward air control, interdiction, escort, armed reconnaissance, and other special missions. After North Vietnam invaded the Republic of Vietnam in Mar 1972 the 8th Wing was augmented by additional F-4 units from the United States. To make room for these forces the B-57 squadron became non-operational and moved to the Philippines. The wing continued combat in Vietnam until mid-Jan 1973, in Laos until 22 Feb 1973, and in Cambodia until 15 Aug 1973. F-4 augmentation forces were released in Sep 1973. In mid-1974 action began to phase down Ubon Aflld, Thailand, and the wing began to lose personnel, aircraft, and units. The last scheduled F-4 training flight occurred on 16 Jul 1974, and on 16 Sep the wing and most of its components moved without personnel or equipment to Kunsan AB, South Korea, where the wing absorbed resources of the 3d TFW that had moved without personnel or equipment to the Philippines. At Kunsan, the wing became responsible for air defense of South Korea and other operational commitments. In Apr 1975 the wing gained an air base squadron at Kwang Ju, often used during numerous tactical exercises. Following the killing of two U.S. Army officers by North Koreans on 18 Aug 1976, the 8th TFW went on increased alert and was quickly augmented by F-4s from the 12th and 67th Squadrons at Kadena AB, Okinawa. The alert status relaxed on 8

Sep 1976 and the augmentation forces were released.

Aircraft. B-29, 1948-1950, 1953-1954; B-47, 1954-1961; KC-97, 1955-1961; B-52, 1962-1968, 1968-1972, 1973-; KC-135, 1962-1968, 1968-1972, 1973-.

Operations. Formed in Aug 1948 from resources of the former North Guam Air Force Base Command (Provisional). Operated North Guam (later, Andersen) AFB, Guam, and maintained proficiency in B-29s. When HQ Twentieth Air Force moved from Guam to Okinawa in May 1949, the former staff of that organization joined the HQ 19th Bombardment

Wing. At the same time the wing assumed responsibility for administering two active and one semi-active bases plus an assortment of communications, weather, radar, rescue, and other facilities and units including the Marianas Air Materiel Area, a wing-size unit. Many of the units and facilities inactivated within a few months, and when the 19th Wing became subordinate to Twentieth Air Force again in Oct 1949, most of the remaining attached units in the Marianas and Bonin Islands transferred to other organizations. From 17 Oct 1949 to 28 Jun 1950 the wing continued B-29 training, operation of Andersen AFB, and some rescue and reconnaissance missions. When the Korean war broke out, the 19th Bombardment Group was immediately detached from wing control and operated from Kadena AB, Okinawa. The wing, meanwhile, remained at Andersen AFB in an administrative and logistical capacity, operating ammunition dumps and providing maintenance to transient aircraft. On 1 Jun 1953 the wing headquarters moved without personnel or equipment to Kadena and absorbed personnel and equipment of the inactivated 19th Bombardment Group. Through 27 Jul 1953 the wing flew 281 B-29 combat sorties (23 missions) in Korea. After hostilities concluded, the wing continued B-29 training, using SAC procedures and techniques. The wing moved to Fla in May-Jun 1954, turning in its B-29s at Davis-Monthan AFB, Ariz, en route to its new base. Began receiving B-47s later in 1954, and gained a KC-97 air refueling unit early in 1955. The entire wing deployed at Sidi Slimane AB, French Morocco, Jan-Apr 1956, and at Ben Guerir AB, Mo-

rocco, May–Jul 1957. From Jul 1957 to Apr 1961 the wing maintained a portion of its tactical resources on overseas alert. The wing operated Homestead AFB, Fla, 9 Jan 1961–2 Jul 1968. Converted to B–52 and KC–135 aircraft in 1961–1962. Won the Fairchild Trophy in the SAC bombing and navigation competition of 1966. The wing moved without personnel or equipment to Robins AFB, Ga, on 25 Jul 1968 and absorbed resources of the former 465th Bombardment Wing. Furnished B–52/KC–135 aircraft and crews to other SAC organizations involved in combat operations in Southeast Asia, and in Jul 1972 the wing no longer was capable of operations because all aircraft and most crews as well as support personnel were loaned to other SAC organizations. Late in 1972 the wing headquarters reduced to a small housekeeping unit because of personnel deployments. Some KC–135 aircraft and crews began returning to wing control in late Mar 1973, but B–52s and their crews did not return to wing control until 28 Oct 1973. Normal operations resumed in Nov 1973.

The 22d Wing's headquarters was at the time non-operational and its components detached. From 10 May 1949 to 16 Feb 1950, after moving to March AFB, Calif, shared a commander in common with the 1st Fighter Wing. Until 30 Jun 1949 the 22d Wing was non-operational, attached to the 1st Wing, but on 1 Jul 1949 the 22d was made operational and assumed host status, with the 1st Wing attached to it for

control until 1 Apr 1950. The 22d Bombardment Group was detached from 14 Nov 1949 to 20 Feb 1950, during which time the wing controlled only the attached fighters of the 1st Wing. The bomb group was detached again for combat in Korea, 4 Jul–c. 31 Oct 1950, and during this period the wing controlled no aircraft. When operational, the wing trained to maintain proficiency in global strategic bombardment, adding air refueling to its mission in 1952. The wing deployed at Mildenhall RAF Station, England, Sep–Dec 1951, and at Upper Heyford RAF Station, England, Dec 1953–Mar 1954. From Apr to Jul 1957 it deployed at Andersen AFB, Guam. The wing was not tactically operational, 11 Mar–15 Sep 1963, while converting to B–52 bombers and KC–135 tankers. Supported Fifteenth Air Force's post attack command and control system with EC–135s, Sep 1964–Mar 1970. The 22d was a "super" wing, 1966–1971, with two bombardment and two tanker squadrons. From 10 Mar to c. 1 Oct 1967 the wing was reduced to a small "rear echelon" non-tactical organization with all tactical resources and most support resources loaned to SAC organizations involved in combat operations in Southeast Asia. The wing continued to support SAC operations in the Far East and Southeast Asia through 1975, and from 10 Apr 1972 to 29 Oct 1973 again had all of its bomber resources loaned to other organizations for combat and contingency operations. KC–135 resources were also on loan from 10 Apr to Sep 1972; afterwards a few tankers returned to wing control. The wing resumed bomber alert in Dec 1973.

Operations. Fighter escort operations to meet SAC commitments, 1947–1948

and 1948–1950. Won the Mackay Trophy for successful deployment of 90 F–84Es from Bergstrom AFB, Texas, to Furstenfeldbruck AB, West Germany, in Sep 1950, via Labrador, Greenland, Iceland, and England. This was the first long-range mass flight of jet aircraft in aviation history. Deployed at Yokota AB, Japan, 19–30 Nov 1950, then split into two echelons. The advance echelon deployed at Taegu AB, South Korea, 1 Dec 1950–30 Jan 1951, while the rear echelon deployed at Itazuke AB, Japan, 9 Dec 1950–31 Jan 1951. Flew combat in Korea, 6 Dec 1950–30 Jun 1951. The two echelons of the wing combined at Itazuke on 1 Feb 1951, continuing combat from that base. Returned to the United States in Jul 1951, but deployed at Misawa AB, Japan, 6 Oct 1952–13 Feb 1953, to provide air defense. Had air refueling as an additional mission, Jun 1953–May 1955 and Aug 1955–Jun 1957. Wing pilot Capt Forrest W. Wilson, in an F–84G, won the Allison Trophy jet aircraft race of the National Aircraft Show at Dayton, Ohio, on 6 Sep 1953, flying the 110.3-mile course at an average speed of 537.802 mph in 12:17.2 minutes. Deployed at Sturgate RAF Station, England, 7 May–17 Aug 1955. Converted to F–101s in 1957 after joining Tactical Air Command. Maj Adrian E. Drew, wing F–101 project officer, broke the world speed record on 12 Dec 1957 when he flew an F–101A over a Mojave Desert course at 1,212.8 mph in one direction and 1,207.5 mph in the opposite direction. Converted to F–100s in late 1958 and early 1959. Deployed at England AFB, La, 29 Mar–5 May 1961, and at MacDill AFB, Fla, 21 Oct–1 Dec 1962, the latter de-

ployment during the Cuban missile crisis. Conducted F-100 pilot and mechanic replacement training, Jan 1966–Jun 1969. Deployed at Holloman AFB, NM, 13 Apr–12 May 1966. Conducted T/AT-33 forward air controller/air liaison officer training, Dec 1968–Jul 1973, phasing out F-100s in mid-1972, and phasing in F-111s beginning Oct 1969. Continued F-111 operations to 4 Aug 1970, and resumed F-111 operations again on 28 Oct 1970. Began conducting F-111 aircrew replacement training in Oct 1971.

Operations. Trained to maintain tactical proficiency, 1947–1948, and

1948–1950. From Dec 1950 through Jul 1951, all tactical components and most support components detached from the wing and deployed in England. Trained to maintain tactical proficiency, Jul 1951–1959, twice deploying as a wing to provide air defense in Japan, Jul–Oct 1952 and Nov 1953–Feb 1954. Made first jet fighter crossing of the Pacific Ocean to reach Japan in Jul 1952, and earned an outstanding unit award for this feat. Rotated tactical components to Alaska, 1956–1957, and to Europe, 1958–1959. Became completely non-operational by early Mar 1959, and moved to Calif in mid-month, absorbing personnel and equipment of inactivated units. From then until Dec 1966, maintained tactical proficiency by participating in exercises, firepower demonstrations, and rotating tactical components on a global scale. Deployed in Fla during the Cuban missile crisis of 1962. Moved to Southeast Asia in Dec 1966, and performed in combat, 16 Dec 1966–9 Sep 1970. Moved to the United States without personnel or equipment on 15 Oct 1970 and absorbed new personnel and equipment. Maintained tactical proficiency from that date, operated F–4 replacement training from 1 Jul 1971, and rotated components to Southeast Asia, Apr 1972–Jun 1973. Assumed responsibility for providing air defense in southern Fla on 1 Apr 1976.

Operations. Wing headquarters not operational and all components de-

tached, Nov 1947-1 Aug 1948 and 1 Aug-15 Nov 1948. The 509th Bombardment Wing at Walker AFB, NM, controlled the wing's tactical units. Headquarters of the 33d Fighter Wing became operational upon movement to Otis AFB, Mass, in mid-Nov 1948. The wing trained to maintain tactical proficiency and participated in exercises and aerial demonstrations Nov 1948-Nov 1949. Assumed an air defense mission in Dec 1949 and provided air defense in the northeastern United States until inactivated in Feb 1952. Again provided air defense in the northeastern United States, Oct 1956-Jun 1957. Non-operational, 1 Jul-18 Aug 1957. In Apr 1965 the wing activated at Eglin AFB, Fla, and embarked on a program of tactical training operations to maintain proficiency. Operated a test support division, Jul 1965-Dec 1967, and a special test squadron, Dec 1967-Apr 1971, in support of tests for weapon systems, aircraft armament and munitions, and tactical procedures of the Tactical Air Warfare Center. The wing also provided F-4 replacement training, 15 Dec 1966-28 Feb 1967. Through deployment of combat-ready tactical components, with personnel and equipment transferred to PACAF units upon arrival, the wing provided fresh aircraft and aircrews for the forces in Southeast Asia and in Korea. Entire resources of squadrons were released as follows: 40th TFS, May 1967, Nov 1968, and May 1969; 4th TFS, Jul 1967; and 16th TFS, Oct 1967 and Apr 1969. In all cases except for the 40th, in May 1969, the squadrons were immediately remanned and reequipped. The wing also transferred two of its combat-ready squadrons to PACAF, the 25th TFS in

May 1968 and the 4th TFS in Apr 1969. The wing's last combat-ready squadron, the 58th TFS, deployed to Southeast Asia for combat operations from Apr to Oct 1972 and again from Jun to Sep 1973. The wing supported the 4485th Test Squadron of the Tactical Air Warfare Center, Jan-Dec 1973, 16-18 Jun 1974, 7-11 Oct 1974, 15-18 Oct 1974, 13-17 Jan 1975, 7-11 Apr 1975, and 8 May-1 Jul 1977, in weapon systems evaluation program tests. Aircrews ferried F-4Es to Israel in Oct 1973. Effective 1 Jan 1976, the wing began augmenting air defenses in the Gulf Coast area. By mid-1977 the wing prepared for conversion to F-15 aircraft in late 1978.

Operations. Flew air defense missions in Japan, Aug 1948–Nov 1950. In Jul 1950 the wing's tactical group and two squadrons deployed to Korea for combat, but the wing (with one assigned and one attached squadron) continued flying air defense missions in Japan, as well as photographic reconnaissance of the Japanese coasts. Wing headquarters moved without personnel or equipment to South Korea on 1 Dec 1950, assuming resources of the 6150th Tactical Support Wing. Flew combat missions in Korea until 25 May 1951, then returned to Japan and resumed an air defense mission with some reconnaissance work. The tactical group was non-operational, 15 Jan–14 Jul 1954; during this time the wing directly controlled the 40th, 41st and 339th Squadrons. The group returned to operational status on 15 Jul 1954, and from 14 Aug to 30 Sep 1954 was detached from the wing. From 8 Oct 1956 the tactical group was again non-operational, and wing headquarters controlled the tactical squadrons until 1 Jul 1957, when it also became non-operational. From 1 Jul until inactivated on 1 Oct 1957, the wing was a "paper" unit, its units controlled by 41st Air Division. Organized again in Apr 1966 at Da Nang AB, South Vietnam, replacing the 7252d Tactical Fighter Wing. Controlled two

F-4C squadrons, two rotational B-57 squadrons, and F-102 flights of the 64th Fighter-Interceptor Squadron, to conduct combat operations in Southeast Asia. On 1 Oct 1966 the 35th and 366th Wings moved in name only, the 35th Wing replacing the 366th Wing at Phan Rang AB, South Vietnam, and becoming an F-100 organization. The two B-57 squadrons also shifted bases, following the 35th Wing to Phan Rang. Also attached to the wing at Phan Rang was RAAF Squadron No. 2, equipped with MK-20 Canberra bombers. Another attached component, actually a *de facto* squadron, was the F-100 equipped Detachment 1, 612th TFS. On 15 Mar 1971, the 612th moved from Japan to Phan Rang in name only, replacing the detachment. Gained an A-37B squadron (8th SOS) in Sep 1970. Began phasing down for inactivation in Apr 1971, standing down from operations on 26 Jun 1971. Remaining resources passed to the 315th Tactical Airlift Wing on 31 Jul 1971 when the 35th Wing inactivated. A few months later the 35th Wing activated at George AFB, Calif, replacing the 479th Tactical Fighter Wing. Participated in tactical exercises, tests, and operations. Provided F-4 aircrew and maintenance personnel replacement training. Gained F-105 units beginning Jul 1973, in addition to F-4 units, and assumed a "Wild Weasel" (radar detection and suppression) mission with these aircraft. Began "Wild Weasel" aircrew training in F-105 and F-4 aircraft in late 1975.

Operations. When formed “from scratch” in early 1953, the wing had few resources and used personnel loaned on temporary duty from Carswell AFB, Texas, some of whom formed a cadre to train new personnel. Of three bombardment squadrons, only the 69th could be manned. Operational training began in Apr for this unit. The 70th Bombardment Squadron began manning in May and commenced flying in Jul. In Aug 1953, the 75th Bombardment Squadron became operational. A portion of the wing deployed at Upper Heyford and Burtonwood, England, 15–23 Sep 1954, and the entire wing deployed at Upper Heyford, 18 Oct–18 Nov 1955. Gained an air refueling squadron in 1955 and lost one bombardment squadron in 1959, just before deploying entire air echelon to Ramey AFB, PR, for 3

months. Converted from B-36 to B-52 bombers in 1956. Lost another bombardment squadron in 1966, and gained a second air refueling squadron in 1968. Supported SAC’s bombardment and air refueling operations in Southeast Asia from the mid-1960s to mid-1975 furnishing aircraft and aircrews, and at times, support personnel to other units.

Primarily B–52, 1970–; and KC–135, 1970–1972, 1973–; but also flew (on logistical support missions) C–97, 1970–1972; and C–118, 1973–1974.

Operations. Strategic bombardment training, 1947–1948 and 1948–1960, and air refueling, 1949–1960, to meet SAC's global commitments. Wing personnel established flight records, flying two B–29s around the world in 1948 in 15 days, flying the B–50 *Lucky Lady II*

nonstop around the world in 94 hours and 40 seconds in 1949, and setting a jet endurance record in 1954 by keeping a B–47 airborne for 47:35 hours. Converted to B–58 aircraft in 1960. From Mar 1960 to Jul 1961 flew YRB–58, TB–58, B–58, and TF–102 aircraft during Category II and III evaluations of the new supersonic bomber, while at the same time operating a combat crew training school to train SAC aircrews in the B–58 weapons system. Continued B–58 evaluations to Jul 1962, and from then until late 1969 served as one of two SAC B–58 wings with a strategic bombardment mission. Also controlled an air refueling squadron from Aug 1964 until inactivated in 1970. During the 1960s the wing continued to establish flight records. On 12 Jan 1961, wing personnel flew a B–58 over a 2,000 kilometer course at an average speed of 1,061.68 mph, and over a 1,000 kilometer course at an average speed of 1,200.194 mph. Two days later, another wing B–58 averaged 1,284.73 mph over a 1,000 kilometer course. In May 1961, a wing B–58 flew a closed course of 669.438 miles at 1,302.048 mph. That same month, another wing B–58 flew from New York City to Paris, France, in 3 hours, 14 minutes, and 44:53 seconds, establishing a new transatlantic speed record of 1,089.36 mph. During a race in 1962, a wing B–58 flew from Los Angeles to New York City at an average speed of 1,214.65 mph, from New York City to Los Angeles at an average speed of 1,081.8 mph, and from Los Angeles to New York City and back in 4 hours, 41 minutes, and 14.91 seconds. The 43d inactivated in Jan 1970, but activated again in Apr 1970, replacing the 3960th Strategic Wing at An-

dersen AFB, Guam. On 1 Jul 1970, the 43d also assumed tasks formerly handled by the Bombardment Wing Provisional, 4133d, assuming a combat role at this time. Employed attached aircraft and aircrews of other SAC units to participate in SAC's "Arc Light" combat mission in Southeast Asia from 1 Jul to mid-Aug 1970, and again from Feb 1972 to Aug 1973. Following the end of combat operations, provided routine training and ground alert with B-52 and KC-135 aircraft, the latter provided by other SAC units on loan. During 1975, provided logistical and medical support to thousands of Vietnam refugees evacuated from their homeland and located temporarily at Guam awaiting resettlement.

Operations. Trained to maintain tactical proficiency while participating in the military occupation and air defense of Japan, 1948–Jun 1950. Remained in Japan until 1 Dec 1950, although components detached for combat operations. The wing's tactical mission was greatly reduced, but did include F–80 pilot training from late Jun to 1 Dec 1950. From 6 Sep to 1 Dec 1950 the wing had no tactical units except a detachment of the 41st Fighter-Interceptor Squadron, which provided strip alert and F–80 pilot training. On 1 Dec the wing moved without personnel or equipment to Taegu AB, South Korea, absorbing resources of another wing, and commenced combat operations. The wing was attached to 68th Fighter-Bomber Wing at Taegu, 16–31 Mar 1953, and on 1 Apr moved without personnel or equipment to Kunsan AB, South Korea, where it absorbed resources of the 474th Fighter-Bomber Wing and continued combat operations to 27 Jul 1953. Moved without tactical components to Misawa AB, Japan, on 7 Nov 1953 and absorbed resources of the 6016th Air Base Wing. Served as an administrative and support wing without tactical operations until Jul 1954, and then assumed an air defense mission with attached squadrons. On 15 Apr 1957 the detached 49th Fighter-Bomber Group became a paper unit and the wing assumed the fighter-bomber mission the group had been perform-

ing, continuing it to 15 Sep 1957, when the wing stood down and prepared to move to France. Replaced the 388th Fighter-Bomber Wing in France in Dec 1957. Participated in tactical exercises and operations in Europe, in support of NATO, Dec 1957–Jun 1968, initially with F–100s, later with F–105s and then F–4s. Replaced by 7149th Tactical Fighter Wing at Spangdahlem AB, West Germany, on 1 Jul 1968, and reformed at Holloman AFB, NM, largely with recent returnees from Southeast Asia. Served as USAF's first "dual-based," NATO-committed wing, subject to immediate return to Europe if and when needed. The entire wing deployed back to Spangdahlem AB 15 Jan–4 Apr 1969 and 14 Sep–7 Oct 1970, receiving the Mackay Trophy for the 1969 deployment. At Holloman AFB, the wing continued participation in tactical exercises and firepower demonstrations to maintain combat readiness. It assumed base host responsibility on 1 Jan 1971. In the autumn of 1971 the wing's four tactical squadrons deployed in Europe. On 4 May 1972 after North Vietnam invaded South Vietnam, the entire wing, except for a rear echelon to run Holloman, deployed at Takhli RTAFB, Thailand. Conducted combat operations in Southeast Asia, 11 May–27 Sep 1972. Returned to Holloman AFB in early Oct 1972, and continued rotating tactical components to Europe to support NATO through Sep 1977. Also provided USAF fighter lead-in training in T–38s, Feb 1974–Dec 1976. Became part of a new organization—Tactical Training, Holloman—on 1 Aug 1977 and lost responsibility for operating Holloman AFB. Began preparing for conversion to

F–15s in 1977 and received the first of the new planes on 8 Sep (officially accepted on 15 Oct) 1977.

Operations. Replaced 301st Fighter Wing (which became non-operational) in Aug 1948, and absorbed the 301st's resources. Provided air defense of the Ryukyu Islands, Aug 1954–Sep 1950. Moved to Japan for combat in Korea, 22 Sep 1950–27 Jul 1953. Moved to Kimpo AB, South Korea, on 10 Oct 1950, and back to Japan 2 months later, while continuing combat in the war zone. Beginning May 1951, operated a detachment of wing elements at Suwon AB, South Korea, until the entire wing moved there in Oct 1951. Thereafter, operated maintenance and supply elements at Tsuiki AB, Japan, until Aug 1954, providing rear echelon support for the forward elements. The wing supported ground forces in Korea and flew patrol, escort, interdiction, and reconnaissance missions. Wing pilots frequently engaged the enemy's jet (MiG) fighters and reported numerous victories in aerial combat. Remained in Korea after the end of hostilities to provide air defense until late Jul 1954. Provided air defense of the Ryukyu Islands, Aug 1954–c. May 1971. From Aug 1954 through 1970, frequently deployed tactical aircraft, crews, and support personnel throughout the Far East, including Korea, Japan, Taiwan, and

the Philippines. One squadron deployed at Tainan, Taiwan, 29 Aug 1958–26 Jan 1959, during the Taiwan Strait crisis. Wing F-86s flew numerous combat air patrol sorties to provide air cover for Nationalist Chinese Air Force flights resupplying besieged garrisons on Quemoy Island. In response to the *Pueblo* incident in 1968, the wing deployed one tactical squadron plus support personnel to Suwon AB, South Korea, 30 Jan–20 Feb 1968, and other personnel to support 314th Air Division at Osan AB, South Korea. A detachment of F-102s, crews, and support personnel deployed at Suwon AB from 28 Jun 1968 through 1970. The wing inactivated at Naha AB, Okinawa, on 31 May 1971, but was soon brought out of retirement to become an air base wing at Osan AB. From 1 Nov 1971 through 29 Sep 1974 the wing served primarily as a support wing, assuming tasks of the former 6314th Support Wing. It operated Osan AB and was responsible for remote site support and the Koon-Ni Range. On 15 Apr 1975 the wing also became responsible for Taegu AB, South Korea. During this "support" period the wing operated C-47 (1971), C-123 (1971–1973), CH-3 (1971–1974), VT-29 (1971–1974), and T-33 (1971–1976) aircraft, mostly in support of 314th Air Division. The wing assumed a tactical mission on 30 Sep 1974 when it gained an F-4E tactical fighter squadron and an OV-10 tactical air support squadron, but support responsibilities continued under a combat support group activated for this purpose. In Jan 1976 the wing gained a tactical control squadron, and in Apr 1976 a direct air support squadron and a

tactical air control center squadron. These additions, with the tactical air support squadron already assigned, comprised the Korean tactical air control system. After 1974 the wing participated in numerous tactical exercises to maintain combat readiness.

Operations. Not operational from activation until 20 May 1943. Commenced air transport and medical air evacuation operations in support of Fifth Air Force on 26 May 1943, advancing as battle lines permitted. Employed C–47s almost exclusively, but during late 1943 and much of 1944 also used converted B–17s for armed transport missions in enemy-held territory. Supported every major advance made by the allies in the Southwest Pacific, operating from primitive airstrips carved from jungles and air-dropping cargo where airstrips unavailable. Took part in the airborne invasion of Nadzab, New Guinea, in Sep 1943 by dropping paratroopers of the 503d Parachute Infantry Regiment as well as Australian engineers and heavy equipment. In Jul 1944, dropped 1,418 paratroopers on Noemfoor Island to aid the allied invasion forces. Then assumed the task of handling all freight and personnel moving in troop carrier aircraft in the Southwest Pacific, in addition to scheduled and unscheduled air movement of cargo and troops, and air evacuation of wounded personnel. Some C–46s began operating within the wing in late 1944, and during 1945 large numbers of C–46s were used in addition to C–47s. By late 1944 and during the early months of 1945, most wing missions were flown to the Philippines. In Feb 1945, the wing flew three more airborne operations, all in the Philippines, to help encircle Japanese concentrations. Wing C–47s dropped napalm on Carabao Island, in Manila Bay, in Mar 1945. When hostilities ended, the wing moved the entire 11th Airborne Division (11,300 personnel) from the Philippines to Okinawa on short notice, and

then began transporting occupation forces into Japan. During Sep 1945, the wing also evacuated over 17,000 former prisoners of war from Japan to the Philippines. The wing served as part of the occupation forces in Japan from 25 Sep 1945 to about 26 Jan 1946, while continuing routine air transport operations and a scheduled courier service. Beginning in Dec 1945 and continuing into mid-1946, most of the wing's components were reassigned to other units or inactivated, and on 15 Jan 1946 the wing became a component of the Far East (soon, Pacific) Air Service Command. Moving to the Philippines, the wing gained new components and flew scheduled routes between Japan, the Philippines, Australia, and the Hawaiian Islands. Replaced by the 403d Troop Carrier Group on 31 May 1946. As the 54th Fighter Wing, served the Georgia Air National Guard from Jul 1946 to Oct 1950. Ordered to active service on 10 Oct 1950 and inactivated the following day, with personnel used as fillers in other USAF units. In Jun 1970, as the 54th Tactical Fighter Wing, replaced the 354th TFW at Kunsan AB, South Korea. Used attached F-4 squadrons in the Republic of Korea.

Also operated, in fewer numbers, VC-54, 1966–1969; T-29, 1966; U-3, 1966–1968; C-47, 1968–1969; C-131, 1969–1975; T-39, 1969–1975.

Operations. When the wing activated in Jul 1948, its tactical units were detached, supporting the Berlin airlift (Operation Vittles) from other bases. The wing operated under control of the

provisional airlift task force from 29 Jul 1948, but was not directly involved in airlift operations until it moved to Fassberg in Jan 1949. From 20 Jan to 26 Sep 1949, the wing flew Berlin airlift missions, primarily with C-54s. The wing then moved to Wiesbaden, replacing the 7150th Air Force Composite Wing. Without a tactical mission until Jun 1951, the wing operated a variety of aircraft in support of USAFE and other units. Upon moving to Rhein-Main AB, West Germany, in Jun 1951 (where it replaced the 61st Troop Carrier Wing), the 60th resumed a tactical role. Operating from Rhein-Main AB until Oct 1955, the 60th Wing provided airlift of troops and cargo throughout Europe, North Africa, and the Middle East. It also provided training to the 433d Troop Carrier Wing, Aug 1951–Jul 1952, and the 312th Troop Carrier Wing, Jul 1952–Mar 1953. Moved to France in 1955 with no change in the basic airlift mission, and continued operations from that area until inactivated in 1958. Replaced the 1501st Air Transport Wing, Heavy, at Travis AFB, Calif, in Jan 1966. Flew global airlift and humanitarian missions from that time to meet MAC commitments, initially with C-124, C-130, C-133, and C-141 aircraft. Lost C-130s in 1966, C-124s in 1967, and C-133s in 1971, but gained MAC's first operational C-5s in Oct 1970. Airlift of cargo and troops to Southeast Asia was a major responsibility of the wing, 1966–1975, but missions flown worldwide as required. A C-141 of the 60th Wing became the first jet to land on the Antarctic continent in Nov 1966. The 60th also played a major role in the airlift of repatriated prisoners of war to the United

States after the Vietnamese ceasefire agreement in 1973, and in the airlift of Vietnamese children and other refugees to the United States in 1975.

Began phasing down for inactivation in mid-Oct 1953, at which time tactical operations passed to 63d Troop Carrier Wing. In Feb 1954, however, began building up again in preparation for an overseas movement, but was inactivated instead. Activated at Dyess AFB, Texas, in Feb 1961 with a troop carrier/airlift mission, plus resupply of Distant Early Warning sites on the Greenland ice cap. Inactivated on 1 Jan 1963. Replaced Troop Carrier Wing Provisional, 4413th, in Jul 1966 at Sewart AFB, Tenn. Provided global airlift and aeromedical evacuation, Jul 1966–May 1971. Also provided C–130 combat crew training for other C–130 units, 1 Jul 1966–6 Mar 1970, with this activity being the wing's primary activity from 9 Aug 1968 to 6 Mar 1970. Replaced at Little Rock AFB, Ark, in May 1971 by 314th Tactical Airlift Wing. Replaced 3500th Pilot Training Wing in Oct 1972 and assumed mission of undergraduate pilot training and operation and maintenance of Reese AFB, Texas.

Operations. When the 67th Wing organized in Nov 1947, only its 67th Reconnaissance Group was fully operational. The entire 67th Wing was attached to the 1st Fighter Wing. The original (Table of Distribution) wing discontinued on 24 Aug 1948 and a new (Table of Organization) wing activated on 22 Aug 1948, the new wing absorbing resources of the original wing. Remained attached to 1st Fighter Wing until inactivated in 1949. The wing activated again in Feb 1951 for operations in Korea. It absorbed resources of the 543d Tactical Support Group and immediately commenced combat reconnaissance operations. Provided photographic coverage of enemy airfields and rail lines, with weather reconnaissance as a secondary task, during the Korean war. After the war, the wing remained in South Korea and later, in Japan, to provide reconnaissance as needed. On 1 Jul 1957, it became the sole reconnaissance wing in the Far

East, and in Sep 1957 added air refueling and military airlift to its mission, these new tasks continuing until the wing inactivated in Dec 1960. Six years later, the wing was organized at Mountain Home AFB, Idaho, charged with aerial, visual, optical, electronic, thermal, and radar reconnaissance. Added RF-4C replacement training to its mission in May 1966, and in Jun 1968, added tactical fighter operations with F-4Ds. This latter mission ceased in Nov 1970. The wing moved to Bergstrom AFB, Texas, in 1971, but from 15 May to 15 Jul 1971, the wing headquarters served in a dual role for the 67th TRW and the succeeding 347th TFW at Mountain Home AFB. At Bergstrom, the 67th absorbed the resources of the inactivated 75th TRW and continued the reconnaissance mission formerly handled by that wing.

84th FIGHTER-ALL WEATHER WING

Lineage. Established as 84th Fighter Wing, All Weather, on 16 May 1949. Activated in the Reserve on 1 Jun 1949. Redesignated 84th Fighter-All Weather Wing on 1 Mar 1950. Ordered to active service on 1 Jun 1951. Discontinued, and inactivated, on 2 Jun 1951.

Assignments. First Air Force, 1 Jun 1949 (attached to 52d Fighter Wing, All Weather [later, 52d Fighter-All Weather Wing], 1 Jun 1949–); Eastern Air Defense Force, 1 Sep 1950–2 Jun 1951 (remained attached to 52d Fighter-All Weather Wing [later, 52d Fighter-Interceptor Wing] to 2 Jun 1951).

Components. *Group.* 84th: 1 Jun 1949–2 Jun 1951.

Stations. Mitchel AFB, NY, 1 Jun 1949; McGuire AFB, NJ, 10 Oct 1949–2 Jun 1951.

Commanders. Unkn, 1 Jun–9 Oct 1949; none (not manned), 10 Oct–13 Nov 1949; Lt Col Frederic N. Millen, 14 Nov 1949–unkn; unkn, c. Jul 1950–2 Jun 1951.

Aircraft. F-82 (of 52d Wing), 1950.

Operations. Activated in the Reserve in 1949 to train as a fighter corollary of the 52d Wing (Regular Air Force), but apparently undermanned and thus performed very little training. During its only 2-week summer encampment (12–26 Jun 1950), the wing had only four pilots capable of flying F-82s. Even nonflying units of the 84th Wing seem to have been poorly manned, and the 52d Wing made little use of its corollary units. The 84th Wing was ordered to active service on 1 Jun 1951, inactivated the next day, and its few people became “fillers” in other USAF units.

Operations. Provided air defense, primarily in West Germany, Jul 1948–Nov 1968, initially as a wing but later as a division. During its 8 years as an air division, the organization supervised the improvement of a manual radar system to a semiautomatic air weapons control system. From Nov 1969 to Jun 1971, it was charged only with tactical reconnaissance, but added tactical fighter operations later in 1971. In Sep 1975, tactical responsibilities were placed in the 86th Tactical Fighter Group so other wing elements could concentrate on a multitude of “host wing” responsibilities connected with support of numerous military units located in the area of Ramstein AB, West Germany.

Operations. Trained 1949-1951 in the organized Reserve as a troop carrier wing. Ordered to active service in May 1951, the wing was soon inactivated and its people used to fill worldwide vacancies in regular units. Trained 1952-1957 in the organized Reserve as a fighter-bomber wing. From Jan 1966 (after replacing the 1254th Air Transport Wing), served Military Airlift Command as a special mission military airlift wing, charged with providing worldwide airlift for the Executive Department and

high-ranking dignitaries of the U.S. Government and of foreign governments as directed. In mid-1975, assumed an additional mission of controlling all T-39 administrative airlift within the United States. Gained a helicopter squadron in Jul 1976 and added rescue and medical evacuation (in the D.C. area) to its mission. In Oct 1976, began training C-12 pilots for units in Alaska and West Germany, and for duty with defense attaché offices and military assistance units. Reduced in size in 1977 through transfer of many aircraft and inactivation of units, and became a group on 30 Sep 1977.

Operations. Performed global strategic reconnaissance, 1948-1957, with emphasis on aerial photography and mapping, 1948-1950, and aerial refueling, 1950-1957. Wing headquarters integrated with headquarters of 301st Bombardment Wing, 1 Apr 1950-9 Feb 1951, although each wing continued tactical operations independently. Tactical components occasionally detached for periods up to 3 months for duty with other USAF establishments. More frequently, wing maintained operational detachments comprised of aircraft and crews drawn from several components to provide reconnaissance support in overseas areas. Such detachments were maintained in England, 19 Jan 1951-20 Mar 1952, 18 Mar-11 May 1952, 21 Oct-12 Dec 1952 and 8 Apr-9 May 1954; in Japan, 23 Mar 1951-30 Nov 1953; in North Africa, 3 Aug-4 Nov 1956; in Newfoundland, 3 Aug-2 Nov 1956; and in Greenland, 1 Oct-8 Nov 1957. From Aug to Nov 1956 most of

the wing deployed overseas in detachments not under operational control of the small establishment remaining in the United States. Inactivated in Nov 1957, but activated in Feb 1963 as a bombardment wing to train for global bombardment and aerial refueling. Except for a small rear echelon, the wing's headquarters staff, tactical aircraft and crews, and most support personnel were integrated in the Strategic Air Command Arc Light force for combat in Southeast Asia, c. 11 Sep 1966-c. 31 Mar 1967. Deployed in Okinawa in response to the *Pueblo* incident, 5 Feb-c. 15 Apr 1968. Not tactically operational c. 1 May-25 Jun 1968 while closing Glasgow AFB, Mont. Moved without personnel or equipment on 25 Jun 1968 to Minot AFB, ND, absorbing personnel and equipment of an inactivated missile wing. Thereafter operated and maintained strategic missiles in a state of operational readiness.

Aircraft. B–29, 1947–1948. B–29, 1948–1949; B–50, 1949–1950, 1950–1954; KB–29, 1950–1953; KC–97, 1953–1955, 1955, 1956, 1956–1957; B–47, 1954–1956; B–52, 1955–; KC–135, 1957–.

Operations. Maintained combat readiness for global strategic bombardment, Aug 1947–Jul 1948 and Jul 1948–Feb 1956, and aerial refueling, beginning Oct 1950. Was first SAC

wing to convert to B–52 aircraft (in 1955–1956). Became SAC's primary B–52 aircrew training organization, adding KC–135 aircrew training in mid-1956. Served as the sole B–52/KC–135 aircrew training organization for SAC (sometimes extending training to other USAF commands and to friendly foreign nations) except for periods Sep 1959–Sep 1963 and Apr 1974–Mar 1977, when other SAC wings also performed such training. From Apr 1968 to Apr 1974, also operated a special B–52 replacement training unit to support SAC's B–52 operations in Southeast Asia. Although most of its components were used for aircrew training, after 1956 the 93d Wing sometimes maintained one or more of its units in a pure tactical role, with operational commitments. Notable operations include the deployment of the 93d Bombardment Group to Okinawa in 1948 (the first SAC bomb group to deploy in full strength to the Far East); deployment of its full tactical force, augmented by support personnel, to England, Jul 1950–Jan 1951; deployment of the entire 93d Wing to England, Dec 1951–Mar 1952; aerial refueling and navigational assistance for the Jul 1952 movement of the 31st Fighter-Escort Wing from the United States to Japan (the first jet fighter crossing of the Pacific Ocean); nonstop B–52 flights of some 16,000 miles around North America and to the North Pole in Nov 1956; the first jet aircraft nonstop flight around the world in Jan 1957 (with wing B–52s flying 23,574 miles in 45:19 hours); and a nonstop, unrefueled KC–135 flight from Yokota AB, Japan to Washington, D.C., in 13:58 hours in Apr 1958.

Operations. Trained as a light bombardment wing in the Reserve, Jun 1949–Mar 1951. Upon being called to active duty during the Korean war, wing personnel augmented other active USAF units. Trained in the Reserve from Jun 1952, in turn as a tactical reconnaissance, bombardment, troop carrier, and airlift wing. Served briefly on active duty during the Cuban missile crisis of 1962. By mid-1958, wing personnel flew airlift missions with C–119s, and after Mar 1959 airlift operations and exercises were flown regularly both in the United States and overseas, including contingency operations in the Dominican Republic in 1965. After converting to C–124s in 1966, flew global airlift missions, including troop and cargo missions to Southeast Asia from 1966 to 1971, augmenting normal airlift resources of Military Airlift Command and Tactical Air Command. After switching to C–7s in mid-1972, the wing's primary operations involved support of U.S. Army airborne forces, tactical cargo airlift, and air evacuation missions. From Jul 1973 to May 1975, the wing also flew

685 C–7 “Coronet Round-up” missions in Puerto Rico, during which it airdropped 1.2 billion sterile screwworm flies as part of a U.S. Department of Agriculture project to eradicate the screw-worm menace in Puerto Rico.

Operations. Organized in Dec 1947 in Alaska from components deployed there from Kansas. Flew training missions over the Arctic Ocean. Moved to Kansas in Mar 1948 and attached to another bomb wing for further training. Reorganized from very heavy to medi-

um bomb wing in Jul 1948, after moving to Biggs AFB, Texas. Added a refueling mission in early 1950. Sent tactical units to England, Nov 1948–Feb 1949 and Jul 1950–Feb 1951. Entire wing deployed in England, 15 Mar–11 Jun 1952, and squadrons operated from Guam, Dec 1952–Mar 1953 and Dec 1953–Jul 1954. Added electronic reconnaissance to bombardment and refueling missions in Apr 1954, using ERB–29A and RB–50G/E aircraft, with reconnaissance missions operating from England and Japan. Transferred the reconnaissance mission in May 1956 but continued bombardment and air refueling training to meet SAC's global commitments. Deployed at RAF Upper Heyford, England, May–Jul 1956. This was last full-wing deployment, but wing components continued deploying overseas regularly, as needed. Phased down for inactivation at Biggs AFB in Dec 1958 and became non-operational 15 Jan 1959, but moved to Ark in Jul 1959 and was remanned and re-equipped later that year with B–52s. Gained KC–135s in Oct 1961. Earned an AFOUA for activities during the Cuban missile crisis of 1962. Supported SAC's combat operations in Southeast Asia in the mid- and late-1960s and early 1970s, furnishing aircraft and crews to other organizations. By mid-1972, all of the 97th's aircraft and over one-fourth of its people loaned to other SAC organizations in the Far East, Southeast Asia, and other overseas locations. A few KC–135s began returning to the wing in Apr 1973, but B–52s on loan until Oct 1973.

Operations. From Nov 1947 to Jul 1948 and Jul 1948 to Jul 1954, the 98th Wing headquarters often manned as a “paper” unit with most of its components attached to other establishments for long periods. The wing’s tactical group was operational, but under control of other organizations from Nov 1947 to Apr 1950, and again from Aug 1950 to Apr 1951. On 1 Apr 1951 the tactical group became a paper unit and wing headquarters deployed to Japan to assume control over combat operations of the three tactical squadrons, while the remainder of the wing remained behind, attached to another wing. In Jun 1952, three maintenance squadrons joined the wing in Japan, as did the small rear echelon of wing headquarters that had remained at Fairchild

AFB, Wash. Combat operations in Korea involved interdiction of enemy communications and support of United Nations ground forces, as well as propaganda leaflet drops. The wing’s last combat mission, flown 25 Jul 1953, was followed 2 days later—on the day of truce—with a propaganda leaflet drop. Remained in Japan in combat-ready status for another year. Meanwhile, wing components not deployed in Japan moved to a reopened base in Nebr to supervise construction in preparation for movement there of deployed wing components. In Jul 1954, after disposing of B–29s in Ariz, the wing headquarters, flying units, and maintenance squadrons moved to Lincoln AFB, Nebr, and for the first time since 1947 all wing components were located at the same base, under wing control. Air refueling operations were already underway in Jul 1954, and the bombardment squadrons prepared to receive B–47s. Participated in SAC’s worldwide bombardment training and air refueling commitments for the next decade. Deployed at Lakenheath RAF Station, England, 11 Nov 1955–29 Jan 1956. From Jan 1964 to Apr 1965, the wing also controlled an Atlas ICBM squadron. Inactivated on 25 Jun 1966 at Lincoln AFB but activated the same day at Torrejon AB, Spain, replacing the 3970th Strategic Wing. For the next decade, the wing had no tactical components assigned, but used attached KC–135 tankers and crews furnished by other SAC wings to provide air refueling support to meet operational, alert, and exercise commitments of SAC, TAC, USAFE, and NATO in an area including the eastern Atlantic, most of Europe, North Africa, and the Middle

East. In Oct 1976, the 306th Strategic Wing, based in West Germany, assumed this support task and the 98th phased down at Torrejon.

Operations. Replaced the 111th Strategic Reconnaissance Wing in Jan 1953. Performed global reconnaissance, Jan 1953–Sep 1956. From Jan 1955 to Feb 1956, one tactical squadron additionally had a FICON (Fighter Interceptor Carrier, Reconnaissance) mission in which GRB-36s tested carrying of RF-84Fs under the fuselage of the bombers to extend the range of the interceptors. Gradually shifted to strategic bombardment training in late 1954. Gained a tanker squadron in Jan 1966 and added air refueling to its mission. The tanker squadron also operated EC-135s used in a PACCS (post attack command control system) role in support of Eighth Air Force until Mar 1970. All tactical and maintenance, and some support resources of the wing, loaned

to SAC forces in the Pacific-Southeast Asia area for combat and combat support operations on several occasions beginning in 1967. During the periods c. 1 Oct 1967–c. 1 Apr 1968, c. 22 Sep 1968–c. 21 Mar 1969, c. 15 Mar–c. 22 Jun 1970, and c. 30 Apr 1972–31 Mar 1974, most of the wing's tactical forces and large portions of its support resources loaned to SAC units engaged in combat operations.

Operations. Established at MacDill AFB, Fla., during the Korean war. Conducted strategic bombardment training, Feb 1951–Feb 1953. Added a refueling mission in Jul 1951. Converted to B–47s in late 1952. Deployed overseas three times, once to England (Sep–Dec 1953) and twice to North Africa (Nov 1955–Jan 1956 and Jan–Mar 1957), in keeping with its mission of global bombardment and air refueling operations. Two wing B–47s set speed records on 28 Jul 1953 when one flew from Goose Bay, Labrador, to Fairford RAF Station, England, in 4:14 hours and the other flew from Limestone AFB, Maine, to Fairford RAF Station in 4:45 hours. Moved to Ind in Jun 1959 and assumed responsibility for operating Bunker Hill (later, Grissom) AFB, Ind. Converted from KC–97 to KC–135 tankers in 1959 and from B–47 to B/TB–58 bombers in 1961, continuing its global bombardment and refueling mission. A wing B–58 set a new speed record on 16 Oct 1963 by flying from Tokyo, Japan, to London, England (via Alaska and Greenland), in 8:35 hours at an average speed of 938 mph. The wing operated a

B–58 combat crew training school, Aug 1965–Dec 1969, and gained an EC–135 post attack command control system (PACCS) mission in mid-1966. The 305th lost all of its bombardment units in Jan 1970 and thereafter concentrated on air refueling and PACCS support.

Operations. Provided B-29 transition training for SAC aircrews, Sep 1950-Feb 1951. Converted to B-47 bombers and KC-97 tankers during 1951. Developed combat procedures and techniques for B-47 jet bombers, 1952. From early 1953 until early 1963, maintained proficiency by constant training in strategic bombardment and aerial refueling operations. Deployed at Fairford RAF Station, England, Jun-Sep 1953, at Ben Guerir AB, French Morocco (later, Morocco), Jan-Feb 1955, Oct 1956-Jan 1957, and Oct 1957, and at Hunter AFB, Ga, Oct-Dec 1962. Phased down for inactivation in early 1963, but moved to a new base and reequipped with B-52s and KC-135s. From Apr 1963 to the autumn of 1973, maintained combat proficiency by constant training in strategic bombardment and air refueling operations. On several occasions, furnished aircraft and personnel to SAC combat forces in the Pacific and Southeast Asia to the point of depleting all home base resources. By the autumn of 1973, lost all tactical forces and began phasing down, at the same time closing McCoy AFB, Fla. Inactivated in Jul 1974. Activated in Aug 1976 to replace 98th Strategic Wing. Not operational, 15 Aug-30 Sep 1976, while becoming organized. Functioned as the focal point for all SAC operations in Europe, and as liaison between SAC and USAFE (and European Command), 1 Oct 1976-. Employed KC/RC-135 air-

craft and crews on loan from U.S.-based SAC wings for air refueling and reconnaissance operations.

Operations. Replaced the 94th Combat Bombardment Wing, VHB (Provisional), and other organizations in Aug 1947. From Aug 1947 until 12 Jul 1948, and from 12 Jul to 15 Dec 1948, the 307th Wing controlled in addition to its own units the 82d Fighter Wing at Grenier Field, NH. From Sep 1947 to Jul 1948, and Jul 1948 to Aug 1950, trained other SAC combat units in antisubmarine warfare. From Feb 1949 through Aug 1950, operated a B–29 transition training school for SAC units, and provided combat crew standardization training for SAC units, Nov 1949–Aug 1950. The wing's 307th Bombardment Group deployed to Okinawa in Aug 1950 for combat operations under FEAF Bomber Command, Provisional. The attached 306th Bombardment Group transferred to its parent wing on 1 Sep 1950, and until 10 Feb 1951, the 307th Wing had no tactical mission. On that date, wing resources were used to man the 6th Air Division at MacDill, and the wing deployed without personnel to Kadena, where it absorbed resources of the 307th Bombardment Group and began flying combat missions. By the end of hostilities, the wing (including its tactical group) had flown 5,810 combat sorties during 573 combat missions. The wing remained in the Far East in combat ready status, and on 15 Aug 1953, Kadena AB, Okinawa, became its permanent base. Returned to the United States in Nov 1954, disposing of B–29s at Davis-Monthan AFB, Ariz, en route to a new base in Nebr. Gained B–47 and KC–97 aircraft in 1955, and, until Jan 1965 when the wing began phasing down for inactivation, conducted strategic bombardment training and air refueling op-

erations to meet SAC's global commitments. Activated in Thailand in Apr 1970, replacing the 4258th Strategic Wing. Until inactivated in Sep 1975, the 307th was the only regular Air Force SAC wing in Southeast Asia. Using aircraft and crews loaned from other SAC wings, the 307th provided KC-135 aerial refueling of U.S. aircraft in Southeast Asia and conducted conventional bombardment operations as directed through the Military Assistance Command, Vietnam. Ended all combat operations on 14 Aug 1973. The final B-52 left the wing in Jun 1975, but the wing continued some KC-135 air refueling and RC-135 reconnaissance operations until inactivated in Sep 1975.

Operations. The 349th Wing has been ordered to active service three times.

During the Korean war, the wing was called up and then inactivated, its personnel used as fillers in other wings. During the Cuban missile crisis of 1962, the wing served a month on active duty. The third mobilization followed the North Korean seizure of the USS *Pueblo* and lasted well over a year, during which time the wing airlifted vital cargo to the Far East, Southeast Asia, and points in Europe and the Middle East. The wing flew its own aircraft until becoming an associate wing in 1969; since then it has flown aircraft of the regular units with which it is associated. From 1969 to 1973, the wing and its components worked with Twenty-Second Air Force and the 60th, 62d, and 63d Military Airlift Wings. Since 1973 the wing has been associated only with the 60th MAW at Travis AFB, Calif.

Operations. Replaced the 342d Fighter-Day Wing in Nov 1956. Switched from fighter-day to fighter-bomber training in Jul 1958. From Jul 1958 through Apr 1966, had one or more squadrons constantly deployed overseas. During the Cuban missile crisis of 1962, part of the wing manned a provisional air division at McCoy AFB,

Fla. During the Dominican Republic crisis of 1965, the 354th deployed over 400 people and 18 F-100s to Ramey AFB, PR, and San Isidro AB, Dominican Republic. The conflict in South-east Asia drained wing strength; one squadron moved to Japan in Nov 1965, another to Spain in Apr 1966, and another to South Vietnam in Aug 1966, leaving the wing with a single flying unit. This last squadron moved to South Vietnam in Apr 1968. The mobilized ANG 113th TFW moved to Myrtle Beach AFB, SC, in Apr 1968, absorbing resources of the 354th. The 354th had no units and existed primarily on paper until it moved to South Korea in early Jul 1968 to replace the 4th TFW. There, it was remanned primarily by ANG people on active duty under 4th TFW control. When the 4th TFW departed, the 354th assumed active F-100 operations. Its two ANG squadrons returned to the United States in Jun 1969, and for 10 days in South Korea the wing was again without tactical components. Several rotational squadrons provided needed tactical force after this brief lapse. On 14 Jun 1970, the 354th passed its resources to the 54th TFW and returned to the United States without personnel or equipment, absorbing resources of the 4554th TFW at Myrtle Beach AFB. Charged with T/AT-33 combat crew training and with becoming proficient with A-7 aircraft, on 10 Oct 1972 the wing split into Advance and Rear echelons, both under the wing commander, with each echelon having a designated commander. The Advance element moved to Thailand and commenced combat operations in Southeast Asia on 16 Oct 1972. The split-wing status continued until 23 May 1974;

during this period tactical units rotated between Thailand and the United States. Recombined at Myrtle Beach, the 354th continued routine A–7 operations until 1977, when it converted to A–10 aircraft.

Operations. Trained in tactical fighter operations, Jul 1962–Nov 1965, and de-

ployed tactical squadrons overseas as required, primarily to combat duty in Southeast Asia. Moved to Thailand in Nov 1965 and performed combat in Southeast Asia, 8 Nov 1965–6 Oct 1970, including air-to-air combat, strike missions, armed reconnaissance, close air support and electronic warfare. Had operational control of an F-111 detachment of the 428th Tactical Fighter Squadron, 17 Mar–19 Nov 1968. Began phasing down for inactivation on 7 Oct 1970. Final aircraft departed 10 Nov and wing inactivated in place on 10 Dec. Replaced the 4453d Combat Crew Training Wing at Davis-Monthan AFB, Ariz, in Jul 1971. That wing and the 355th shared commanders and staff through 30 Sep 1971, and built up the 355th as an A-7D unit while phasing down the 4453d as a F-4C unit. Ended F-4 training in mid-Oct 1971. Began training with A-7Ds in a close air support role in Jul 1971. Conducted tactical drone reconnaissance operations, Jul 1971–Jun 1976. Became combat ready with A-7s and 22 Aug 1972. Participated in numerous tactical exercises in the United States and overseas. Trained A-7 pilots for other USAF units. Maintained an A-7 detachment at Howard AFB, CZ, 15 Nov 1972–1 Feb 1974. Augmented an advanced echelon of the 354th TFW at Korat RTAFB, Thailand, Oct 1972–Jul 1973 and Dec 1973–May 1974. Began preparations early in 1975 for conversion to A-10s, and received first of these close air support aircraft in Mar 1976. Conducted A-10 pilot training and supported a follow-on test and evaluation of the aircraft system, beginning 25 Aug 1976. Served as host wing at home base, 30 Sep 1976–31 Mar 1977.

Operations. Provided day and night visual and photographic reconnaissance, 1947–1948 and again, 1948–1949. Besides performing tactical electronic and photographic reconnaissance, Sep. 1950–Apr 1951, controlled light bombardment and provided B–26 crew replacement training. Wing headquarters was not operational, 25 Apr–10 Oct 1951. (During this period, all headquarters personnel were integrated into the Tactical Air Division Provisional, which directly controlled all wing components.) Regained wing integrity on 11 Oct 1951. Provided tac-

tical reconnaissance from Oct 1951, also provided electronic reconnaissance, Nov 1953–Feb 1974, and weather reconnaissance, Nov 1953–Dec 1964. Provided combat crew training for reconnaissance crews, Oct 1951–Dec 1954 and Apr 1956–Apr 1959. Deployed aircraft and crews in small detachments, or as part of composite squadrons to support overseas reconnaissance needs. Deployed at Langley AFB, Va, 1 Jun–1 Oct 1959, and at MacDill AFB, Fla, 21 Oct–30 Nov 1962. From MacDill, played a major reconnaissance role during the Cuban missile crisis of 1962 and received an Air Force Outstanding Unit Award presented personally by President John F. Kennedy. Performed a major reconnaissance role during the Dominican Republic crisis of 1965–1966. Supported U.S. operations in Southeast Asia in the 1960s and early 1970s by deploying numerous detachments and transferring several highly trained squadrons to that area. Provided replacement training of tactical reconnaissance and tactical electronic warfare crews, and combat crew training, beginning Jan 1966. Flew many test projects for the Tactical Air Reconnaissance Center, 1966–1967 and 1970–1971. Deployed a detachment of EB–66s to the Far East during the *Pueblo* crisis of 1968. Also rotated EB–66 crews to Southeast Asia, 1972–1973. The wing, during all of these operations, also participated in numerous tactical exercises and operations, worldwide.

1965-1972; EC-47, 1972; O-2, 1972; OV-10, 1972; F-111, 1972-.

Operations. Replaced the 132d Fighter-Bomber Wing when activated in Jan 1953. Trained to maintain combat proficiency. Conducted air refueling, Sep 1954-Jul 1958. Rotated tactical squadrons to France, 1954-1956, and to Italy, 1955-1957. Served as conventional strike force in Europe, 1962-1963. Moved to the United States in Jul 1963 and converted to F-4 aircraft in 1965. Moved to Southeast Asia in Mar 1966 for combat operations. In addition to its F-4 squadrons, also controlled several F-100 squadrons in 1966. On 10 Oct 1966, wing designation switched with that of 35th TFW at Da Nang AB, South Vietnam, giving the 366th new personnel, equipment, and facilities. By early 1967, many of the wing's combat missions involved flying cover for F-105 strike aircraft, offering numerous opportunities for aerial combat with North Vietnamese MiG aircraft. Wing pilots achieved 18 aerial victories in Southeast Asia. In 1972, gained the 362d TEWS, equipped with EC-47N/P/Q aircraft, and 20th TASS, flying O-2A and OV-10A aircraft. The former had an electronic countermeasures mission, while the latter had a forward air control mission. Moved to Thailand in Jun 1972 with little change in combat missions; aircraft now limited to F-4s. Continued combat operations until moved without personnel or equipment to the United States in Oct 1972. Replaced the 347th TFW at Mountain Home AFB, Idaho, becoming operational with F-111F aircraft. In 1977, in a three-way switch of aircraft, transferred F-111Fs to a wing in England and

gained F-111A aircraft from a wing at Nellis AFB, Nev.

Operations. Operated Harmon Field, Guam, Aug 1948–Mar 1949, and provided troop carrier operations in the Pacific and Far East. Moved to Japan in Mar 1949, assuming control over Tachikawa (later, Tachikawa AB), which it operated until 1 Jan 1956. Performed routine transport operations until the outbreak of war in Korea in Jun 1950. With assigned and attached components, performed combat airlift, airdrops, and aeromedical evacuation in Korea throughout the war. Also flew courier flights throughout the Pacific area. Transported the first of several groups of repatriated prisoners of war from Korea to Japan in Apr 1953 (Operation Little Switch), and subsequently transported United Nations prisoners of war (Operation Big Switch) from North Korea. Following hostilities, the wing resumed its normal troop carrier and airlift operations in the Far East and Pacific area, including participation in tactical exercises and humanitarian missions. Operated in Indo-China (now Vietnam) in 1954, flying in observers, maintenance personnel, and liaison officers and evacuating wounded French troops. Trained C-46 pilots of the Japanese Air Self Defense Force, Nov 1954–May 1955. On 1 Jul 1957, transferred to Military Air Transport Service and inactivated, replaced in part by 1503d Air Transport Wing. Nine years later, in Aug 1966, replaced the 6315th

Operations Group at Naha AB, Okinawa, and assumed a mission heavily involved in airlift to Southeast Asia, as well as intra-theater airlift for elements of the Pacific Command. In addition, the wing supported Army Special Forces training, participated in tactical exercises, and flew search and rescue and humanitarian missions as needed. The wing phased down for inactivation in early 1971 and from 27 Apr to 31 May had no aircraft. On 31 May, the wing replaced the 314th Tactical Airlift Wing in Taiwan. Saved from inactivation and revived with new resources, the 374th remained heavily committed to support of operations in Southeast Asia, and also continued routine airlift in other areas. One of the wing's humanitarian missions—flood relief in the Philippines—earned it a Philippine Republic Presidential Unit Citation in 1972. The wing provided support in Mar 1973 for Operation Homecoming, the repatriation of American prisoners from Hanoi, North Vietnam. The wing maintained a forward operating location in Thailand until mid-1976, and was quite active in that area. It took part in Operation Baby Lift (evacuation of Vietnam orphans) and Operation New Life (evacuation of Vietnamese refugees) in Apr 1975. During the recovery of the SS *Mayaguez* from the Cambodians in May 1975, a wing aircraft dropped a 15,000-lb bomb on Koh Tang Island to create a helicopter landing area. The wing became part of the Military Airlift Command on 31 Mar 1975, at which time it gained an aeromedical airlift mission in the Far East.

Reserve training, Jul 1952-Nov 1957. Conducted domestic aeromedical airlift/evacuation operations in the United States, Alaska, and off-shore areas of the North Atlantic and the Caribbean from Jan 1966 for MAC, other Department of Defense agencies, the U.S. Public Health Service, and the Veterans Administration (VA), with the C-9 Nightingale as principal mission aircraft beginning in 1969, and augmented by aircraft of ANG (1968) and other MAC units. Used missions to train personnel of ANG and Reserve in aeromedical evacuation. Between Jan 1966 and Apr 1975 wing maintained and scheduled support aircraft at Scott AFB, Ill, and from Aug 1966 to Apr 1975 wing used mostly aircrews of other Scott-based units to provide scheduled air shuttle/courier service to the east and west coasts. From Jan 1966 to Sep 1968 and since Jun 1973 wing operated and maintained Scott AFB. Airlifted over 700 VA hospital patients

from Biloxi and Gulfport, Miss, to safety during Hurricane Camille in Aug 1969; during Project Homecoming in early 1973 the wing flew 119 sorties to airlift some 350 U.S. POWs to 26 hospitals in the United States. In Oct 1973 an aeromedical evacuation center, established under wing control at Scott AFB, assumed the functions previously handled by smaller centers at Scott, McGuire AFB, NJ, and Travis AFB, Calif. In Apr 1975, when the aeromedical evacuation support units in West Germany and the Philippines came under wing control, the wing became the single-point manager for worldwide DOD aeromedical evacuation services.

Aircraft. F–84, 1957; F–100, 1957–1970; F–4, 1970–.

Operations. From Sep 1957 to Apr 1966, the wing participated in numerous firepower demonstrations, tactical exercises and maneuvers in the United States and overseas, and deployed its tactical squadrons to bases in Europe and the Middle East in support of NATO. From 19 Oct to 5 Dec 1962, during the Cuban missile crisis, all wing tactical and support elements not deployed overseas operated from Homestead AFB, Fla. From Feb 1964 to Nov 1965, squadron deployments shifted to the Far East and Southeast Asia in support of operations in that area, then returned to support operations in Europe-Middle East. The wing moved to Spain in Apr 1966, and from Torrejon AB continued NATO support by keeping deployed tactical squadrons on alert status. The only break in this status came during conversion from F–100 to F–4 aircraft in 1970.

Operations. Trained as a Reserve troop carrier wing until called to active service in Apr 1951, then trained to gain combat proficiency. Moved to Japan in Apr 1952 and for remainder of that year supported troop carrier and tactical airlift requirements of the Far East Com-

mand and United Nations. Inactivated in Japan and activated at Portland Intl Aprt on 1 Jan 1953, again as a Reserve wing. Until Nov 1957, trained as a Reserve troop carrier wing. Moved without personnel or equipment to Selfridge AFB, Mich, in Nov 1957, absorbing resources of another Reserve wing. Continued training as a Reserve troop carrier wing, beginning the Air Reserve Technician (ART) program in Apr 1958. Participated in many tactical exercises and humanitarian missions. Had a 1-month tour of active duty during the Cuban missile crisis of 1962. Assumed an additional mission of tactical air support and trained with U-3As for a short period in 1969. Had no components (except its headquarters) from 31 Dec 1969 to 1 Jun 1970. Assumed a tactical air support and special operations mission in Jun 1970, using O-2, U-3, and A-37 aircraft. Lost O-2, U-3, and A-37 aircraft in 1971 and gained C-130s for tactical airlift missions. For the next 5 years, the wing performed tactical airlift operations, participating in many exercises and humanitarian missions. Flights were made on a global basis, many to Southeast Asia. Shifted to a rescue and recovery mission in 1976, controlling all four Air Force Reserve rescue squadrons. In Jan 1977, added weather reconnaissance to its mission.

Operations. Replaced 108th Fighter-Bomber Wing in Dec 1952. Operated Godman AFB, Ky, Dec 1952–Apr 1953, and Langley AFB, Va, May 1953–Oct 1957. At the latter base, replaced 4430th Air Base Wing and operationally controlled numerous tactical and support components until Oct 1957. Operations included gunnery and bombardment training, firepower demonstrations, weapons delivery training, and numerous tactical exercises, 1952–1958, plus air refueling, 1954–1958. Replaced 6200th Air Base Wing at Clark AB, Philippines, in Apr 1959. Provided air defense and offen-

sive fighter operations in the Philippines, Taiwan, and other Far Eastern points, Apr 1959–Jun 1962. Operated Clark AB and its satellite facilities, Apr 1959–Mar 1965 and Dec 1971–Sep 1974. Provided air defense training for Royal Thai Air Force personnel, from a base in Thailand, Nov 1961–Feb 1966. From mid-1962 until the end of the conflict in Southeast Asia, frequently deployed assigned and attached components to bases in Southeast Asia for air defense and combat operations under operational control of other organizations. When not so involved, components trained in air defense and other tactical exercises in Taiwan and the Philippines. During Jul–Aug 1972, provided extensive flood relief to Philippine areas inundated by monsoon rains. During Feb–Mar 1973, provided medical, logistical, and administrative support for former prisoners of war, on their way to the United States from North Vietnam. Replaced by 3d Tactical Fighter Wing in Sep 1974.

Aircraft. F-84, 1952–1953; F-86, 1953–1958.

Operations. Replaced 123d Fighter-Bomber Wing in Jul 1952. Trained in fighter-bomber and air defense operations, 1952–1953. Provided air defense in the United Kingdom, 1954–1958, and in the Netherlands, 1954–1955. Phased down for inactivation, 15 Feb–15 May 1958. Replaced 406th Tactical Fighter Training Group in Jul 1972. Assumed responsibility for operating and maintaining Zaragoza AB, Spain, and associated gunnery ranges and air combat tactics training area. Combat units of the United States Air Forces in Europe (USAFE) sent weapons training detachments to Zaragoza for training. These detachments were fully supported, and temporarily controlled, by the 406th TFTW, although the wing had no tactical squadrons or aircraft permanently assigned. In addition to range training, attached detachments often participated in tactical exercises. Beginning in Sep 1972 the wing also operated the USAFE Tactical Forces Employment School, and in May 1976 began operating the USAFE Instructor Pilot School. Weapons training detachments were principally F-4 aircraft, although F-111s used the wing's ranges for a short period in 1974 and U.S. Navy A-7s also used range facilities in Jun 1974, operating tem-

porarily from Zaragoza. From 1 Nov to 17 Dec 1976, and 5 Jan to 2 Mar 1977, OV-10 detachments used the ranges, and from 15 Nov to 17 Dec 1976, and 5 Jan to 29 Apr 1977, F-5s also used the ranges. The 406th TFTW began full maintenance support of a SAC KC-135 detachment on a permanent basis in Nov 1976.

Aircraft. RF–84, 1958; RF–101, 1958–1959; RB–66, 1959. In addition to EB–66, 1966–1967; RF–101, 1966–1967; RF–4, 1966–1975; and F–4, 1967–1975; also flew a few RC–47, 1966–1969; and a few AC–47, 1969–1970. AQM–34 (drone), 1976–; DC–130, 1976–; RC–130, 1976–; CH–3, 1976–.

Operations. Replaced the 432d Tactical Reconnaissance Group in Feb 1958, assuming tactical reconnaissance mission. Operated USAF Advanced Flying Training School, Tactical Reconnaissance, Mar 1958–Jun 1959. Inactivated in Jun 1959. Organized in Southeast Asia in Sep 1966 to perform combat tactical reconnaissance. Added tactical fighter operations in Oct 1967, initially using fighters to provide combat air patrol and cover for unarmed reconnaissance planes, but later to fly strike missions. Wing fighter units destroyed many enemy aircraft: 36 confirmed aerial victories between 17 Dec 1967 and 8 Jan 1973. Also used AC–47D gunships to provide air defense of friendly Laotian outposts, Jun 1969–Jun 1970. Ceased combat in Vietnam in Jan, in Laos in Feb, and in Cambodia in Aug 1973. The wing remained in Southeast Asia to perform reconnaissance and routine training to remain combat proficiency, changing

designations from reconnaissance to fighter in Nov 1974. The wing supported the evacuation of U.S. personnel from Phnom Penh, Cambodia, on 12 Apr 1975, and the evacuation of American and certain South Vietnamese personnel from Saigon on 29 Apr 1975. From 13 to 15 May 1975, the wing played a major role in locating the SS *Mayaguez* and in the military operations associated with the recovery of that American commercial vessel and its crew from the Cambodians. The wing was relieved of all operational commitments on 30 Nov and inactivated at Udorn RTAFB, Thailand, on 23 Dec 1975.

Organized as 432d Tactical Drone Group in Jul 1976 to perform photographic reconnaissance and to support tactical air and surface forces with tactical drones. Used AQM–34L/M/V drones, DC–130 launch vehicles, and CH–3 recovery helicopters. Conducted follow-on testing and evaluation of the AQM–34V model drone and initial operational testing and evaluation and developmental testing and evaluation of the DC–130H “mother ship.” Supported testing and evaluation of the BQM–34C drone at Hill AFB, Utah.

Operations. Replaced 435th Troop Carrier Wing, a Reserve unit released from active duty, in Dec 1952. From then until early 1955, participated in numerous tactical exercises in the United States and overseas, mostly in conjunction with Army airborne forces. Reorganized on 1 Mar 1955. The tactical group and all support components inactivated and the wing assumed control over three tactical squadrons plus

three squadron-size detachments, each squadron/detachment having eight specially modified C-119s and manned for self-sufficient operations. Participated in Project Drag Net, part of Project C-119L. The wing's task was to perform air recovery of balloon-borne instrument packages. From c. 22 Apr 1955 to 26 Mar 1956 the wing was controlled by the 1st Air Division (Meteorological Survey) in support of the high-altitude research program. Wing headquarters moved to Shiroy AB, Japan, and components were located at other points in Japan, the Aleutian Islands, Alaska, and Okinawa. On 26 Mar 1956 the wing was released from its attachment to the 1st Air Division and on 10 May began its return to the United States. At Ardmore AFB, Okla, the 456th Wing was attached to the 463d Troop Carrier Wing until the 456th inactivated in Jul 1956. Eight years later the 456th, redesignated as a strategic aerospace wing, replaced the 4126th Strategic Wing at Beale AFB, Calif, and assumed a mission of strategic bombardment training and air refueling. It also controlled a Titan I strategic missile squadron until early 1965. The wing's bombardment and air refueling squadrons frequently deployed aircraft and crews to meet USAF requirements, often having nearly all of their resources scattered around the world at various operating locations. Inactivated in Sep 1975 and replaced by the 17th Bombardment Wing.

Davis, 5 Aug 1977–.

Aircraft. F-84, 1952–1953. F-100, 1957–1965; F-111, 1968–1977; F-4, 1977–.

Operations. Activated in Japan and moved the same day to South Korea with tactical components to begin combat operations. Tactical components were detached on 1 Apr 1953, while the rest of the wing reduced to “paper” status, a condition which prevailed until the wing inactivated in 1954. Activated in the United States in Oct 1957 and until mid-Sep 1964 maintained proficiency in tactical fighter operations, deploying components, aircraft, and crews on a global basis in support of NATO, PACAF, AAC, and other organizations. Deployed three squadrons to southeastern United States during the Cuban missile crisis of 1962. Entire wing, except for a deployed squadron in Southeast Asia, reverted to “paper” status on 15 Sep 1965, the single de-

tached squadron being reduced to “paper” status upon its return to the United States. Wing gained sparse manning on 1 Oct 1966 in anticipation of conversion to F–111 aircraft, and c. 30 Jun 1967 again reverted to “paper” status. On 20 Jan 1968 the 474th TFW, 474th FMS, and the 428th TFS moved without personnel or equipment to Nellis AFB, Nev, and the 474th AEMS and 474th MMS inactivated. The units that moved to Nellis absorbed the resources of an inactivating wing. Gaining the 474th CSG, 474th Tactical Hospital, and 474th Supply Squadron, the 474th Wing became host unit for Nellis. There it acquired the F–111 equipped 4527th CCTS. On 20 Jan 1968 the 428th TFS organized Detachment 1, which also received F–111 aircraft. This detachment deployed c. 18 Mar to 22 Nov 1968 to Southeast Asia. On 15 May 1968 the 429th TFS discontinued attachment to another wing and rejoined the 474th Wing without personnel or equipment. A former component, the 430th TFS, became part of the wing on 15 Sep 1968. Tactical components of the wing received their initial F–111s between Nov 1968 and Mar 1969 and began training for proficiency in the new weapon system. The 4527th CCTS trained F–111 aircrews for the wing and for other USAF units until replaced in Oct 1969 by the 442d TFTS, which assumed the mission. The 4474th TTS, assigned 1 Dec to 15 Jun 1970, was sparsely manned and never equipped with F–111s. Upon inactivation of the 474th CSG, 474th Tactical Hospital, and 474th Supply Squadron in Feb 1970, the 474th Wing became a tenant at Nellis AFB. Wing assumed an operationally ready status between 31 Jan and

8 Sep 1971, and from Sep 1971 initiated tactical exercises for the maintenance of tactical operational proficiency. Over 1,600 tactical and support personnel of the wing deployed on 27 Sep 1972 to Takhli RTAFB, Thailand, to participate in combat operations in Southeast Asia. A rear echelon of wing headquarters remained at Nellis to control units not deployed. The 430th TFS returned to Nellis on 23 Mar 1973, assuming a replacement training unit mission; on 30 Jul 1973, the 428th and 429th Squadrons became subordinate units of the 347th TFW in Southeast Asia. In 1975 both of these overseas squadrons were again assigned to the 474th Wing. On 6 Aug the last F–111 aircraft and crews were transferred to Mountain Home AFB, Idaho, and the 474th Wing absorbed the F–4D aircraft, crews, and resources of the inactivating Tactical Fighter Wing Provisional, 4474th. Trained combat-ready force of aircrews and maintained a rapid-reaction capability to execute fighter attacks against enemy forces and facilities in time of crisis, 1975–.

Operations. Provided air defense in Japan, 1948–1949. Replaced the 39th Air Division at Misawa AB, Japan, in Jan 1968 and trained for offensive and reconnaissance operations, 1968–1971. Two assigned squadrons (45th Tactical Reconnaissance and 612th Tactical Fighter) were “paper” units during their entire assignment, since each unit had all of its resources in a detachment

in Southeast Asia. The wing maintained forward operating locations at Kunsan, South Korea (Jan 1968-Mar 1971) and Taegu, South Korea (Jul 1968-Apr 1970), and maintained squadrons or segments thereof at each location, with periodic rotation back to Misawa. A major earthquake on 16 May 1968 caused over \$1 million damage to Misawa facilities. Phased down at Misawa in early 1971 and inactivated on 15 Mar, all resources moving to Kunsan AB, South Korea, for the 3d Tactical Fighter Wing. Replaced the 6100th Air Base Wing at Yokota AB, Japan, on 1 Nov 1971 and inherited a huge support complex, with some 47 installations in all parts of Japan, including Yokota and Tachikawa Air Bases, Fuchu and Chitose Air Stations, and numerous family housing complexes in the Tokyo area. Briefly controlled a C-130 airborne communications reconnaissance squadron (Nov 1971-Jun 1972) and a Royal Thailand Air Force C-123 detachment (Nov 1971-Jul 1976). The Thai detachment provided airlift support to the United Nations Command (Rear). In support of Fifth Air Force, the wing also controlled: C-54 (1971-1972), VC-118 (1971-1975), T-29 (1971-c. 1972), T-33 (1971-1972), T-39 (1971-) and UH-1P (1971-). The wing gradually closed down many of its installations, sites, and facilities, inactivating operating units thereof, and was preparing to close Tachikawa AB, Japan, in Sep 1977.

Operations. Replaced 403d Troop Carrier Wing, Medium, in Jan 1953. Performed troop carrier and air transport operations in the Far East, including landing of troops and cargo in forward areas of the combat zone, air transportation of airborne troops and equipment, and air evacuation of casualties. In Jun 1953, as the Korean war neared an armistice, all wing C-119s airlifted the entire 187th Regimental Combat Team (Airborne) from Japan to Seoul and Chunch'on, South Korea, to preclude enemy breakthroughs. This was the largest mass movement of personnel in the history of combat cargo to that time. Between Apr 1953 and Sep 1954, the wing aided the French Air Force in Indo-China by training aircrews, evacuating wounded, and maintaining aircraft. Provided intra-theater airlift of cargo and personnel to specified organizations in Southeast Asia beginning Jan 1967, initially with C-7A aircraft transferred from the U.S. Army. Gained a tactical electronic warfare mission in mid-1971 and a special operations mission in the autumn of 1971. Phased down for inactivation beginning early 1972.

Operations. Replaced and absorbed resources of the 513th Troop Carrier Group in Oct 1957. Participated in numerous tactical exercises and operations of TAC to maintain assault airlift proficiency, Oct 1957–Nov 1958, controlling three assigned and two attached flying squadrons. Organized at Evreux-

Fauville AB, France, in Apr 1966. Operated that base until 1 Jul 1966, then moved to England and assumed responsibility for operation and maintenance of RAF Mildenhall. The wing provided after Apr 1966 EC-135 aircraft and crews to support the European Command's airborne command post. From Apr 1966 to Jan 1976, the wing also provided intra-theater airlift in support of U.S. Air Forces in Europe, European Command, and North Atlantic Treaty Organization operations and exercises. C-130s and crews for this airlift mission were provided by U.S.-based wings of Tactical Air Command and Military Airlift Command. From Jul 1968 to May 1969 the wing also briefly controlled C-124 airlift operations in Europe, using planes and crews furnished by the 904th, 918th, 921st, 938th, and 941st Military Airlift Groups of the Air Force Reserve. Since Jan 1976, when another wing assumed control over rotational C-130 units and the intra-theater airlift mission, the 513th has continued its base operation and its airborne command post support with a drastic decrease in exercise participation, but with more emphasis on support of tenant organizations at RAF Mildenhall.

Operations. Formed in Jun 1949 at Birmingham, Ala, from resources of 19th Air Division and 99th Bombardment Group. Trained as a Reserve troop carrier organization under supervision

of the 2587th Air Force Reserve Training Center. Moved without personnel or equipment to Mitchel AFB, NY, in Oct 1949, leaving resources for the 319th Bombardment Wing, Light, at Birmingham, and taking over resources of the 84th Fighter Wing at Mitchel AFB. Trained as a Reserve troop carrier wing under supervision of the 2233d AFRTC until ordered to active service in May 1951. From then until inactivated in Feb 1953, performed troop carrier operations and took part in numerous tactical exercises and joint training operations. Operated a C-46 combat crew training school, 15 Sep 1952–20 Jan 1953. Began converting to C-119 aircraft on 31 Dec 1952. Replaced by 313th Troop Carrier Wing, Medium, on 1 Feb 1953. Activated in the Reserve at Mitchel AFB on 1 Apr 1953, replacing 65th Troop Carrier Wing, Medium. Trained under supervision of 2233d Air Force Reserve Combat Training Center (later, 2233d Air Reserve Flying Center) to 1958, initially with C-46s but with C-119s by Aug 1954. Summer camps conducted at Mitchel (and later, McGuire AFB, NJ) and at many other bases. Began participating in the Air Reserve Technician (ART) program on 1 Apr 1958 and from 14 Jul to 1 Oct 1958 absorbed functions and some personnel of the 2233d ARFC, which then inactivated. After 1958, the wing increasingly participated in airlift missions, tactical exercises, humanitarian missions, and mercy flights. By the mid-1960s the wing was augmenting Military Air Transport Service (later, Military Airlift Command) airlift operations on a regular basis. The wing trained South Vietnamese aircrews and maintenance personnel, and Royal

Hellenic Air Force maintenance personnel, in C-119 aircraft, 10 Aug to 18 Dec 1967, and ferried many C-119s to South Vietnam in 1968. Shortly after two of its groups began converting to C-124s in 1966 the wing lost these groups, but gained two C-119 groups. In 1968 two of the wing's groups shifted from Tactical Airlift to Military Airlift (Associate) status, transferring their C-119s and thereafter flying C-141s of the regular wings with which they were associated—the 436th MAW at Dover AFB, Del, and the 438th MAW at McGuire AFB. A third C-119 group was retained until mid-1970. Gained a C-124 group in Apr 1969, but it soon converted to an Aeromedical Airlift Group (Associate), flying C-9s of the 375th Aeromedical Airlift Wing. This group remained with the wing through 1971. A third C-141 associate group joined the wing in Sep 1969, associated with the 437th MAW at Charleston AFB, SC. In Jul 1973, however, the wing's groups at Dover and Charleston were replaced by new Reserve wings, and the 514th Wing itself absorbed all of the squadrons of what had been its 903d Group at McGuire AFB. Named as Air Force Association's "outstanding Reserve flying wing" for 1976.

Operations. The 552d operated from McClellan AFB, Calif, 1955 until inactivated in 1976. Through its squadrons, detachments and operating locations, it extended air defense radar coverage and fighter control seaward beyond the range of shore-based stations. Late in 1958, the 552d assumed the additional mission of performing gap-filler duty for temporarily inoperative ground radar stations. Tracked ballistic missiles in the Pacific after 1957 and provided support for *Discoverer* and *Mercury* space flight projects. On 11 Aug 1960 wing aircraft vectored and controlled the aircraft that recovered the *Discoverer XIII* capsule. Deployed aircraft and crews to McCoy AFB, Fla, (19 Oct-5 Dec 1962) during the Cuban missile crisis. Operated extensively in Southeast Asia, 1965-1974, as part of the Big (later, College) Eye Task Force. During this time the 552d expanded operations to the eastern coast of the United States and to Iceland. Redesignated as a group on 1 Jul 1974 because of a reduction in components and a reduced mission; remained in this status until inactivated on 30 Apr 1976. Redesignated 552d Airborne Warning and Control Wing, and activated on 1 Jul 1976 at Tinker AFB, Okla, the wing provided worldwide operation of Airborne Warning and Control E-3A aircraft as directed by the Tactical Air Command.

APPENDICES

Appendix I

Lineage Terms

Each unit and establishment of the Air Force possesses a separate identity, its own lineage and history. The War Department and, later, the Department of the Air Force have sought to preserve these separate organizational identities. In recent years, however, the Department of the Air Force introduced two changes in this basic policy. In a major adjustment, the service temporarily bestowed, under certain conditions, the history and honors of combat groups on similarly numbered combat wings. This practice began in 1954 and continues today. A second, minor adjustment substituted the Table of Organization (T/O) units and establishments created in 1948 for the Table of Distribution (T/D) organizations used in the 1947–1948 service test of the wing-base plan.* This volume treats these initial T/D and subsequent T/O organizations as single entities instead of separate establishments and units.

Between 1947 and 1977 the Air Force was composed of primary elements called units and establishments. The units divide among three primary categories: *squadrons* (later, the numbered flight was added as a “small” squadron), *miscellaneous* (a category including such organizations as bands, infirmaries, hospitals, etc.), and *headquarters*. The headquarters units served as headquarters for establishments. Establishments are Air Force organizations at group echelon or higher, having a headquarters unit as their primary component.

Headquarters units were “designated and organized” for the wings included in the 1947–1948 service test of the wing-base plan, and discontinued when the service test concluded in 1948. Headquarters units for the wings subsequently were “constituted and activated” (1948–1959 and 1968–current), or were “constituted, activated, and organized” (1959–1968). The units were “inactivated” (1948–1959 and 1968–current), or “discontinued and inactivated” (1959–1968),

*Details of this service test appear in the introduction to this volume.

when no longer needed. The establishments to which the headquarters units belonged, however, were “established” concurrently with the designation or constitution of their headquarters unit. If the Air Force disbanded a wing’s headquarters unit (example: see 24th Composite Wing), the wing was “disestablished,” and, when the headquarters unit was reconstituted, the wing was “reestablished.” Otherwise, the lineage terms for establishments parallel those of the units.

The lineage of each wing establishment contained in this book is ultimately determined by the language employed in the War Department and Department of the Air Force letters and command orders relating to organizational actions. The following glossary defines the more important terms that appear in the lineage and honors histories.

Glossary of Terms

Activate. To bring into physical existence by assignment of personnel to the headquarters unit (from 1922 to 1959, and again after 1968). An establishment is activated when its headquarters unit is activated. During the period 1959–1968, however, activate meant to place on the active list, available to be organized.

Assign. To place in a military organization, as a permanent element or component of that organization.

Attach. To place one military organization temporarily with another for operational control and other purposes, including administration and logistical support.

Consolidate. To combine or merge one establishment with another, so that the lineage and history of both become one. Establishments are consolidated effective with the consolidation of their headquarters units. Consolidation can only occur when the establishments involved were active at different times. (Example: see 26th Tactical Reconnaissance Wing.)

Designation. The name of a unit or establishment. The designation includes all parts of the name: numerical, functional, and generic. A designation also applies to named activities and certain functions. To further identify a unit, descriptive words are sometimes added parenthetically. Such words are not a part of the official designation, but are used to clarify the official designation.

Discontinue. To withdraw all personnel from the headquarters unit (1959–1968). This action placed the establishment and its headquarters unit on the inactive list for those wings involved in the 1947–1948 service test of the wing-base plan.

Disestablish. To terminate an establishment concurrent with disbandment of its headquarters unit, until reestablished.

APPENDIX I

Establish. To assign a designation concurrent with the designation (1947–1948) or the constitution (1922–1947 and 1948–current) of the headquarters unit.

Establishment. A military organization at group or higher echelon, composed of a headquarters unit and any other elements that might be assigned. Personnel are not assigned to an establishment, but to its components.

Inactivate. To withdraw all personnel from the headquarters unit and place the establishment and its headquarters unit on the inactive list (from 1922 to 1959 and from 1968 to date). During the period 1959–1968, however, to be inactivated meant to be transferred from the active to the inactive list, after being discontinued.

Order to Active Service. Reserve establishments are ordered to active service from Reserve status for a period of extended active duty with the regular Air Force.

Organization. As used in this volume, the term organization applies to units and establishments.

Organize. To assign personnel to the headquarters unit (1947–1948 service test organizations). During the period 1959–1968, being organized also involved the assignment of personnel to the headquarters unit, after the headquarters unit and the establishment were activated.

Redesignate. To change the designation (number or number and name) of both the establishment and its headquarters unit.

Reestablish. To return a previously existing establishment from disestablished status to the active list, so it can be activated.

Relieve from Active Duty. Reserve units are relieved from active duty with the regular Air Force upon completion of a period of extended active duty.

Unit Decorations

AMERICAN

Distinguished Unit Citation (DUC).

Used by the U.S. Army and Army Air Forces. First established by Executive Order 9075 on 26 Feb 1942, awarded for extraordinary valor in action on or after 7 Dec 1941.

Presidential Unit Citation (PUC).

Equivalent to the Distinguished Unit Citation. The PUC is used by the U.S. Navy and was awarded to a number of AAF units that operated under Navy control or in close support of the Navy. After 1965, the U.S. Air Force adopted the Presidential Unit Citation instead of the Distinguished Unit Citation to recognize outstanding combat performance of its tactical units.

Air Force Outstanding Unit Award with Combat "V" Device (AFOUA/V).

The AFOUA/V is awarded in lieu of the AFOUA (below) to recognize achievement in combat by USAF units and establishments. The Combat "V" Device was first used during the conflict in Southeast Asia.

Air Force Outstanding Unit Award (AFOUA).

A relatively new USAF decoration used to recognize outstanding efforts and meritorious actions of USAF units and establishments in peace and war, the AFOUA was announced in Department of the Air Force General Orders No. 1 on 6 Jan 1954. (Several units and establishments received this award retroactively, for meritorious actions during the Korean war.)

Meritorious Unit Commendation (MUC).

The U.S. Army's Meritorious Unit Commendation, roughly equivalent to the AFOUA (above), has been earned by a number of AAF and USAF units. This decoration recognizes outstanding and meritorious actions in both peace and war, but these actions are considered to be of a lesser consequence than those recognized by a Distinguished Unit Citation (above).

Navy Unit Commendation (NUC).

The U.S. Navy Unit Commendation, also roughly equivalent to the AFOUA (above), has been awarded to a few AAF and USAF units which worked closely with the Navy. The award recognizes outstanding and meritorious actions in both peace and war, but these actions are considered to be of a lesser consequence than those recognized by a Presidential Unit Citation (above).

FOREIGN**Belgium.****Citation in the Order of the Day, Belgian Army.**

A citation by decree of the Belgian Government. Numerous AAF units and establishments which operated in or over Belgium during World War II received this award.

Belgian Fourragere.

A decoration awarded, by decree of the Belgian Government, to units cited twice in the Order of the Day, Belgian Army.

France.**Croix de Guerre.**

A citation by decree of the French Government, awarded to Army Air Forces units and establishments. Generally identified as French Croix de Guerre with Palm.

French Fourragere.

A decoration, awarded by decree of the French Government, to units and establishments cited twice for the Croix de Guerre.

Korea.**Republic of Korea Presidential Unit Citation.**

A citation for achievement during the Korean war. Most commonly presented to units based in Korea and carrying out combat operations there, but also awarded to some units, both combat and support types, based in adjacent areas. Since the cessation of hostilities in Korea in July 1953, this decoration has been awarded rarely to USAF units and establishments, usually in recognition of outstanding support in the defense of Korea.

Philippines.**Philippine Presidential Unit Citation.**

A citation for achievement while serving in the Philippines during the periods 7 Dec 1941–10 May 1942 or 17 Oct 1944–4 Jul 1945. No date is connected with the citation. Only one award is authorized for every eligible unit, including units which served in the Philippines during both periods.

APPENDIX III

Philippine Republic Presidential Unit Citation.

A number of USAF units stationed in the Republic of the Philippines in July and August 1972 earned this citation in recognition of their participation in disaster relief operations.

Vietnam.

Republic of Vietnam Gallantry Cross with Palm.

This unit decoration was usually awarded to units and establishments actually engaged in combat in defense of the Republic of Vietnam, but in numerous instances it was also awarded to combat support organizations and tactical units that were based outside the Vietnam Theater yet flew missions to the theater or provided essential services to organizations flying to or operating within the theater.

USAF Bestowed History*

During World War II, combat squadrons were normally organized into combat groups, with three or four squadrons in each group, the group serving as the basic combat element of the Air Force. In many commands, although the practice was not uniform throughout the Air Force, two or more combat groups formed a wing for administrative or operational control (see *Air Force Combat Units of World War II*, *passim*.).

This organization changed in 1947 when the Air Force adopted the wing-base plan. Each combat wing was given one combat group (with three or four combat squadrons) and three support groups (air base, supply and maintenance, and medical). The wings required by this plan were new organizations, the old World War II wings being redesignated divisions (see wing histories in *Air Force Combat Units of World War II*). The combat wing and its integral combat group carried the same numerical and functional designations; for example, the 9th Bombardment Group was an integral part of the 9th Bombardment Wing.

In February 1951 the Strategic Air Command (SAC) began to eliminate its combat groups by reducing group headquarters to token strength (one officer and one enlisted man) and attaching the combat squadrons directly to the wings. Thus, the wing replaced the group as the basic combat element of SAC. On 16 June 1952, with the approval of Headquarters USAF, Headquarters SAC inactivated the headquarters of all combat groups (that had remained active under token manning) and assigned the remaining combat squadrons to the wings. The SAC reorganization also retired the World War II histories and honors of SAC's combat groups, while the SAC wings, having been created during or after 1947, possessed no World War II histories or honors.

*This appendix is based on Attachment 1 (Wing-Group Relations, Inheritance of History and Honors) to Air Force Pamphlet 210-2, Guide to Lineage and Unit History, 2 Jun 1975.

Deviations from the wing-base plan by other commands, particularly Air Defense Command (ADC), also affected the perpetuation of histories and honors of World War II groups. In 1954 SAC and ADC leaders asked Headquarters USAF to perpetuate the histories and honors of the World War II combat groups. The *ad hoc* committee which reviewed these requests rejected the idea of redesignating combat groups as wings. Instead, the committee recommended that combat groups and wings be maintained as separate and distinct organizations, and that the histories and honors of combat groups be bestowed upon the similarly designated combat wings.

Although the *ad hoc* committee's proposed bestowals ran counter to a long-standing policy of the Air Force against transferring history and honors from one unit to another, Headquarters USAF accepted the committee's recommendations. In November 1954 the Department of the Air Force issued a series of AFOMO letters which bestowed upon each active combat wing the history and honors of its similarly designated combat group; for example, SAC's 9th Bombardment Wing received by bestowal the history and honors of the 9th Bombardment Group. This bestowal of honors fell into two classes:

- a. Those where the combat groups were now inactive (as in SAC).
- b. Those where the combat groups remained active components of their related wings (as in TAC). In the second instance, however, Headquarters USAF went beyond the original intention of SAC, to perpetuate in the new wings the histories and honors of *inactive* World War II groups.

Since the initial bestowals in November 1954, the Department of the Air Force has continued to bestow the histories and honors of inactive groups on active wings of a similar designation. But, in some cases the letters have bestowed group histories a second time on wings that had been covered already by the bestowals made in November 1954, then subsequently inactivated. In other cases, the bestowals were newly made to wings not active in November 1954.

Other commands followed SAC's lead, eliminating combat groups and assigning squadrons directly to the wings. The Air Force, however, has continued to regard each combat group, albeit inactive, as an integral part of the similarly designated combat wing. Despite the trend to do away with combat groups, some survived as active organizations, and from time to time inactive groups have been activated. Beginning about 1957, active combat groups have usually been assigned to divisions or higher organizations, rather than to wings. The major exceptions appear in the reserve forces, where, since 1963, tactical wings usually have had two or more tactical groups (with numerical designations different from their wings), with one tactical squadron assigned to each group.

In bestowing group histories and honors on wings, Department of the Air Force directives have not specified any conditions or limitations except to note, in AFOMO letters issued after the initial bestowals of November 1954, that such bestowals are temporary. For a variety of reasons, particularly organizational developments after the initial bestowals, the Air Force found it necessary to

APPENDIX V

formulate rules to govern temporary bestowals of histories and honors. In 1963 the interested USAF agencies agreed that the exceptional bestowal of history and honors:

1. Will be made only from AFCON combat groups to AFCON combat wings, with the bestowal in each case being from the group that has the same numerical designation as the recipient wing, and which is regarded by the Air Force as the primary-mission group, and thus an integral part of the wing, even though the group is inactive.
2. May be made if the group is:
 - a. Inactive.
 - b. Active and assigned to the similarly designated wing.
3. Will not be made if:
 - a. The group is active and assigned to any organization other than the similarly designated wing.
 - b. Any combat group other than the one related by similarity of designation is assigned to the wing.
4. Will apply only to that portion of the group's history which the group accrued, and to those honors which the group earned, during a period when the wing was not active.
5. Is temporary and:
 - a. Becomes effective upon activation of the wing's headquarters.
 - b. Terminates under any of the following circumstances:
 - (1) The group is assigned to any organization other than its similarly designated wing.
 - (2) The wing is assigned another combat group in place of, or in addition to, the similarly designated group from which it received the bestowal.
 - (3) The wing's headquarters is inactivated.
